

Board of Retirement Regular Meeting

Sacramento County Employees' Retirement System

Agenda Item 8

MEETING DATE: May 19, 2021

SUBJECT: Portfolio Allocation and Rebalancing Report – First Quarter 2021

SUBMITTED FOR: X Consent Deliberation and Action Receive and File

RECOMMENDATION

Staff recommends that the Board receive and file the quarterly asset allocation and rebalancing report.

PURPOSE

This item complies with the SCERS Master Investment Policy Statement reporting requirements related to the review of SCERS' current asset allocation as it compares to established targets and ranges, and physical and Overlay Program rebalancing activity that occurred during the quarter.

SUMMARY

SCERS employs an Overlay Program, which is managed by State Street Global Advisors (SSGA), to rebalance the asset allocation to policy targets and also invests available cash, in a manner which replicates SCERS' policy target strategic asset allocation.

SCERS' Overlay Program reduces the need for physical rebalancing, but it does not eliminate it. While physical rebalancing typically costs more to execute compared to the Overlay Program, it remains important to assess whether SCERS' portfolio is at a point where physical rebalancing warrants greater consideration.

Below is a summary of SCERS' asset category and asset class positioning relative to the target allocations as of March 31, 2021 (based on State Street market values, which can differ from those of SCERS' investment consultants). The comparisons to the benchmark allocations below, and throughout the memo, are made in two formats: (1) the difference between the actual allocation, and (2) the percentage amount of the actual allocation relative to the target allocation.

<u>Asset Category</u>	<u>Asset Class</u>	<u>Current Allocation</u>	<u>Target Allocation</u>	<u>Difference</u>	<u>% Relative to Target</u>
GROWTH*		58.7%	58.0%	0.7%	101%
	Domestic Equity	22.0%	20.0%	2.0%	110%
	International Equity	20.1%	20.0%	0.1%	101%
	Private Equity	10.6%	9.0%	1.6%	117%
	Public Credit	1.8%	2.0%	-0.2%	89%
	Private Credit	2.0%	4.0%	-2.0%	49%
	Growth Absolute Return	2.3%	3.0%	-0.7%	78%
DIVERSIFYING*		21.6%	25.0%	-3.4%	86%
	Public Fixed Income	15.2%	18.0%	-2.8%	84%
	Diversifying Absolute Return	6.4%	7.0%	-0.6%	92%
REAL RETURN**		16.0%	16.0%	0.0%	100%
	Real Estate	7.2%	7.0%	0.2%	103%
	Real Assets	4.9%	7.0%	-2.1%	70%
	Liquid Real Return	3.9%	2.0%	1.9%	193%
OPPORTUNITIES		0.0%	0.0%	0.0%	N/A
DEDICATED CASH		0.8%	1.0%	-0.2%	82%
OTHER CASH/OVERLAY		2.8%	0.0%	2.8%	N/A

* Growth and Diversifying allocation weights do not include overlay proxy exposures, which are included in the Overlay allocation

** Real Return allocation includes overlay proxy exposures

During the first quarter of 2021, the following Overlay Program rebalancing occurred:

- Quarter-end rebalance:
 - Purchased \$27 million in Growth proxy.
 - Purchased \$9 million in Diversifying proxy.
 - Sold \$13 million in Real Return proxy.
 - Sold/reduced cash allocation by \$23 million.
 - Market movements in the first quarter were more benign compared to the large market swings in previous quarters, so the Overlay rebalance activity at the end of the first quarter was also tempered.

Key current portfolio segment allocations relative to targets, activity, and physical rebalancing considerations include:

- **Domestic Equity** has a 22% allocation as of March 31, 2021, down from a 22.9% allocation as of December 31, 2020. The 22% allocation is above the 20% target allocation, and is at the top of the range of 22%.
 - During the quarter, Staff implemented physical rebalancing, reducing exposure to several domestic equity managers by approximately \$211 million in aggregate, to bring the allocation from 23.5% to 21.7%.
 - The strong performance of equities relative to fixed income during the remainder of the first quarter brought the Domestic Equity portfolio back to the high end of the range.
- **International Equity** has a 20.1% allocation as of March 31, 2021, up slightly from a 20% allocation as of December 31, 2020. The 20.1% allocation is in line with the 20% target allocation.

-
- During the quarter, Staff implemented physical rebalancing by reducing exposure to a developed market growth manager by approximately \$50 million, and adding approximately \$50 million to a developed market value manager, to bring the growth/value mix closer to target.
 - **Public Fixed Income** has a 15.2% allocation as of March 31, 2021, down from a 15.8% allocation as of December 30, 2020. The 15.2% allocation is below the 18% target allocation, but within the range.
 - During the quarter, Staff implemented physical rebalancing, adding \$40 million to one of SCERS' core plus fixed income managers, to bring the allocation from 15.4% to 15.7%.
 - The strong performance of equities relative to fixed income during the remainder of the first quarter moved the Public Fixed Income portfolio farther from the target.
 - **Alternative Assets** – the following activity occurred within SCERS' alternative assets asset classes during the quarter:
 - Absolute Return
 - None
 - Private Equity
 - None
 - Private Credit
 - None
 - Real Assets
 - \$35 million commitment to Digital Colony Partners II, LP
 - Real Estate
 - None

BACKGROUND

The Overlay Program rebalances the asset allocation to policy targets and minimizes the risk that SCERS falls short of achieving its targeted return due to the asset allocation straying from policy target ranges. The Overlay Program also invests available cash, including: (1) unallocated cash; (2) the cash balances in manager portfolios; and (3) cash held for previously committed to, but un-invested private market investments, in a manner which replicates SCERS' policy target strategic asset allocation. The Overlay Program does not invest the 1% dedicated cash allocation.

While SCERS' Overlay Program reduces the need for physical rebalancing, it does not eliminate it, as there are circumstances whereby physical rebalancing would be a better solution compared to the Overlay Program, including when there is a persistently large difference between physical assets and the target allocation.

While physical rebalancing typically costs more to execute compared to the Overlay Program, it remains important to assess whether SCERS' portfolio is at a point where physical rebalancing warrants greater consideration.

The Overlay Program structure replicates SCERS' asset category targets (Growth; Diversifying; Real Return), with bands around these targets (see below). The rebalancing methodology that

SSGA utilizes is quarterly rebalancing with bands, where rebalancing occurs on a quarterly basis, unless the bands are breached on an intra-quarter basis, in which case rebalancing occurs upon the breach of a band.

Asset Category	Minimum Allocation (%)	Target Allocation (%)	Maximum Allocation (%)
Growth	53	58	63
Diversifying	22	25	28
Real Return	14	16	18
Cash	0	1	2

Each asset category has a separate overlay proxy, which contains a mixture of investments that attempt to replicate the objectives and exposures of the asset category and the underlying asset classes within the asset category, in order to minimize tracking error and costs.

There remain some larger gaps between target and actual allocations within some private market assets classes. Private market asset class implementation (Private Credit; Real Assets) continues to make progress, but takes multiple years to execute given the unique capital pacing budgets for these segments of the portfolio. Private Equity is more mature, and in-line with its 9% target allocation.

The underlying components of each asset category overlay proxy are shown at the end of this report.

DISCUSSION

Because SCERS’ Overlay Program rebalances SCERS’ total fund, it is important to note that **Tables 1-16** in Appendix A refer only to physical holdings compared to policy targets, and not the exposures provided through the Overlay Program. The exception is Table 11 (Real Return asset category exposure), which includes the SSGA Real Return Strategy within the Liquid Real Return asset class, which is the Overlay proxy for this asset category, and is implemented through physical exposures (commingled funds).

As noted, SCERS rebalances the fund via both the Overlay Program and physically purchasing or selling assets. The Overlay Program is particularly effective in rebalancing public market assets due to the low tracking error of the underlying proxies compared to public market managers and the higher expenses of purchasing and liquidating interests held by investment managers. On the other hand, the Overlay Program is not as effective in tracking alternative assets because it is limited to the use of public market proxies. Public market proxies will not, for example, be able to replicate the ‘illiquidity premium’ or higher returns achieved historically by private equity and private real assets, or the ‘absolute’ return characteristics of SCERS’ Absolute Return portfolio, including its the ability to outperform equity markets in times of distress. Accordingly, it is beneficial for SCERS to continue physically investing in alternative assets to achieve its asset allocation targets rather than heavily relying on the Overlay Program to rebalance these assets to the target allocations.

SCERS' investment staff and general investment consultant, Verus Advisory, monitor the asset allocation on a quarterly basis and update the Board if the asset allocation moves outside of policy ranges and conditions warrant physical rebalancing.

GROWTH ASSET CATEGORY

The Growth asset category is comprised of the Domestic Equity, International Equity, Private Equity, Public Credit, Private Credit, and Growth Absolute Return segments of the portfolio. As outlined in **Table 1**, the Growth asset category currently has an allocation of 58.7%, which is slightly higher than the strategic asset allocation's target of 58%, and the allocation is 101% relative to the target allocation. At a more granular level, the Domestic Equity exposure is above target while the alternative asset class exposures are below target, so the two offset each other (International Equity is in line with target).

The Overlay Program rebalances the Growth asset category to the 58% target allocation by purchasing or selling global equity futures to bring the Domestic Equity and International Equity asset classes to their target allocations, and then adjusts the remainder of the asset category by using a combination of 85% global equity futures and 15% U.S. Treasury futures.

At the end of the quarter, SCERS' overlay manager, SSGA, purchased approximately \$27 million of overlay proxy exposure to rebalance the Growth asset category to its target allocation.

Domestic Equities:

As outlined in **Table 2**, SCERS' Domestic Equity asset class actual weighting of 22% is above SCERS' policy target allocation of 20%, and the allocation is 110% relative to the target allocation and is at the top of the range of 22%.

During the quarter, Staff implemented physical rebalancing, reducing exposure to several domestic equity managers by approximately \$211 million in aggregate, to bring the allocation from 23.5% to 21.7%. The specific activity is listed in the chart below. The rebalance occurred over 3 days, and the combined cost of the domestic equity and international equity rebalances (international equity is described below) including commissions and market impact costs, came in 11.8 bps, which was in line with State Street Global Market's pre-trade estimate of 11.1 bps.

Domestic Equity Investment Manager	Rebalanced Amount
Alliance Bernstein - passive large cap	(\$94,000,000)
JP Morgan - active 130/30	(\$33,000,000)
D.E. Shaw - active 130/30	(\$17,000,000)
Eagle Capital - active large cap	(\$37,000,000)
AQR - active large cap	(\$30,000,000)
Total:	(\$211,000,000)

The continued strong performance of equity markets during the first quarter brought the portfolio back to the high end of the range, despite the physical rebalancing that was implemented. Staff does not recommend any additional physical rebalancing at this time.

SSGA buys and sells a basket of U.S. equity index futures to rebalance the Domestic Equity asset class to the policy target allocation, when physical rebalancing is not required.

At the sub-asset class level, U.S. large cap, at a 19.7% allocation is above the target allocation of 18%. U.S. small cap, at a 2.3% allocation is also above the target allocation of 2%.

International Equities:

As outlined in **Table 3**, SCERS’ International Equity asset class actual weighting of 20.1% is in-line with SCERS’ policy target allocation of 20%, and the allocation is 101% relative to the target allocation.

While the International Equity allocation is in-line with the target, the asset class has had an overweight to growth and an underweight value exposure. During the quarter, Staff implemented physical rebalancing by reducing exposure to a developed market growth manager by approximately \$50 million, and adding approximately \$50 million to a developed market value exposure, to bring the growth/value mix closer to target. The specific activity is listed in the chart below.

International Equity Investment Manager	Rebalanced Amount
LSV - developed large cap value	\$50,000,000
Walter Scott - developed large cap growth	(\$50,000,000)
Total:	\$0

SSGA buys and sells a basket of international equity index futures to rebalance the International Equity asset class to the policy target allocation, when physical rebalancing is not required.

At the sub-asset class level, international large cap, at a 13.8% allocation is slightly below the target allocation of 14%. International small cap, at a 2.1% allocation is slightly above the target allocation of 2%. Emerging markets equity, at a 4.3% allocation is above the policy target allocation of 4%.

Private Equity:

As outlined in **Table 4**, SCERS’ Private Equity allocation of 10.6% is above the policy target allocation of 9%, but within range, and the allocation is 117% relative to the target allocation. Private market valuations are lagged a quarter.

SSGA utilizes a basket of 85% global equities and 15% U.S. Treasuries to replicate Private Equity, as part of a broader non-public equity proxy within the Growth asset category.

Please note that there is an investment within the Opportunities portfolio (Atalaya Special Opportunities Fund V, LP) which draws capital from the Private Equity asset class, as this is the asset class with the closest risk and return profile of the opportunity being invested in by this fund. The market value of this investment is \$5.5 million, less than 0.1% of the total portfolio.

Public Credit:

As outlined in **Table 5**, SCERS' Public Credit allocation of 1.8% is below the policy target allocation of 2%, and the allocation is 89% relative to the target allocation. SSGA utilizes a basket of 85% global equities and 15% U.S. Treasuries to replicate Public Credit, as part of a broader non-public equity proxy within the Growth asset category.

Private Credit:

As outlined in **Table 6**, SCERS' Private Credit allocation of 2.0% is below the policy target allocation of 4%, and the allocation is 49% relative to the target allocation. Private credit valuations are lagged a quarter.

SSGA utilizes a basket of 85% global equities and 15% U.S. Treasuries to replicate Private Credit, as part of a broader non-public equity proxy within the Growth asset category. The commitment schedule and cash flow forecast of Private Credit investments projects SCERS achieving and maintaining the policy target in 2023.

Growth Absolute Return:

As outlined in **Table 7**, SCERS' Growth Absolute Return allocation of 2.3% is below the policy target allocation of 3%, and the allocation is 78% relative to the target allocation. SSGA utilizes a basket of 85% global equities and 15% U.S. Treasuries to replicate Growth Absolute Return, as part of a broader non-public equity proxy within the Growth asset category.

DIVERSIFYING ASSET CATEGORY

The Diversifying asset category is comprised of the Public Fixed Income and Diversifying Absolute Return segments of the portfolio. As outlined in **Table 8**, the Diversifying asset category currently has an allocation of 21.6%, which is below the strategic asset allocation's target of 25%, and the allocation is 86% relative to the target allocation.

The Overlay Program rebalances the Diversifying asset category to the 25% target allocation by purchasing or selling U.S. government bond futures.

At the end of the quarter, SCERS' overlay manager, SSGA, purchased approximately \$9 million of overlay proxy exposure to rebalance the Diversifying asset category to its target allocation.

Public Fixed Income:

As outlined in **Table 9**, SCERS’ Public Fixed Income allocation of 15.2% is below SCERS’ policy target allocation of 18%, and the allocation is 84% relative to the target allocation.

During the quarter, Staff implemented physical rebalancing, adding \$40 million to one of SCERS’ core plus fixed income managers, to bring the allocation from 15.4% to 15.7%. The specific activity is listed in the chart below. For the fixed income rebalance, capital was allocated directly to TCW, rather than using a transition manager.

Fixed Income Investment Manager	Rebalanced Amount
TCW - core plus	\$40,000,000
Total:	\$40,000,000

The strong performance of equities relative to fixed income during the remainder of the first quarter moved the Public Fixed Income portfolio farther from the target to the current allocation of 15.2%.

The Overlay Program utilizes a combination of U.S. Treasury futures and Mortgage TBAs to rebalance this segment of the portfolio to its policy target allocation, as part of a broader Diversifying asset category proxy.

Diversifying Absolute Return:

As outlined in **Table 10**, SCERS’ Diversifying Absolute Return allocation of 6.4% is slightly below the policy target allocation of 7%, and the allocation is 92% relative to the target allocation.

SSGA utilizes a combination of U.S. Treasury futures and Mortgage TBAs to rebalance this segment of the portfolio to its policy target allocation, as part of a broader Diversifying asset category proxy.

REAL RETURN ASSET CATEGORY

The Real Return asset category is comprised of the Real Estate, Real Assets, and Liquid Real Return segments of the portfolio. As outlined below in **Table 11**, the Real Return asset category currently has an allocation of 16%, which is in line with the strategic asset allocation’s target of 16%, and therefore the allocation is 100% relative to the target allocation.

The Overlay Program rebalances the Real Return asset category to the 16% target allocation, through the SSGA real return overlay proxy, by purchasing or selling a series of commingled funds across global REITs, global infrastructure stocks, global natural resource stocks, commodities, U.S. TIPS, and floating rate notes.

At the end of the quarter, SCERS' overlay manager, SSGA sold approximately \$13 million of overlay proxy exposure to rebalance the Real Return asset category to its target allocation.

Real Estate:

As outlined in **Table 12**, SCERS' Real Estate allocation of 7.2% is slightly above the policy target allocation of 7%, and the allocation is 103% relative to the target allocation. Non-core real estate valuations are lagged a quarter.

SSGA utilizes a series of listed commingled funds described above to replicate Real Estate, as part of the broader Real Return asset category proxy.

Real Assets:

As outlined in **Table 13**, SCERS' Real Assets allocation of 4.9% is below the policy target allocation of 7%, and the allocation is 70% relative to the target allocation. Private real asset valuations are lagged a quarter.

SSGA utilizes a series of listed commingled funds described above to replicate Real Assets, as part of the broader Real Return asset category proxy. The commitment schedule and cash flow forecast of Real Assets investments project SCERS achieving and maintaining the policy target in 2025.

Liquid Real Return:

As outlined in **Table 14**, SCERS' Liquid Real Return allocation of 3.9% is above the policy target allocation of 2%, and the allocation is 193% relative to the target allocation. The Liquid Real Return allocation is split between a strategic active mandate managed by Brookfield Asset Management and the SSGA Real Return Overlay proxy. The latter is used to adjust broad Real Return asset category exposures during quarterly overlay rebalancing, which drives the overweight to the segment.

OPPORTUNITIES PORTFOLIO

The allocation for SCERS' Opportunities portfolio, outlined in **Table 15**, is slightly above 0% (minimal \$5.5 million allocation to one fund) compared to the 0% target allocation, and within the policy range of 0% to 5%. Any investments made within the Opportunities portfolio draw capital from the asset class with the closest risk and return profile as the opportunity being invested in. Since the target allocation for Opportunities is 0%, the Overlay Program does not utilize a proxy allocation for the Opportunities portfolio, as it does for the other asset categories.

CASH

As outlined in **Tables 16 and 17**, SCERS' total cash balance is approximately 3.6% (as of March 31, 2021), which includes a combination of the 0.8% dedicated cash allocation and 2.8% in other cash. The dedicated cash allocation of 0.8% is 82% relative to the 1% target allocation.

The dedicated cash allocation is intended to close the gap between benefit payments and total contributions in an environment where investment earnings fall short of the targeted assumed rate of return, and also serves as an emergency source of cash during a market dislocation.

The 2.8% other cash allocation is comprised mostly of the pre-funded annual employer contribution from fiscal year 2020/21, and is therefore used to fund monthly benefit payments. It is also used to fund future drawdowns within the private markets segments of the portfolio. SCERS' Overlay Program rebalances the portfolio by eliminating cash drag by investing the non-dedicated cash allocation (2.8%) into positions that replicate SCERS' target portfolio.
