

Board of Retirement Regular Meeting

Sacramento County Employees' Retirement System

Agenda Item 18

MEETING DATE: December 9, 2020

SUBJECT: Annual Independent Financial Statement Audit

SUBMITTED FOR: Consent **Deliberation and Action** **Receive and File**

RECOMMENDATION

Staff recommends the Board receive and file the reports as of and for the fiscal year ended June 30, 2020 issued by SCERS' independent auditor, Brown Armstrong Accountancy Corporation (Brown Armstrong), which include the Comprehensive Annual Financial Report prepared by Staff. Audit Committee Chair, Ben Lamera, will present the reports and summarize the results of the audit.

PURPOSE

This item supports the Strategic Management Plan by maintaining transparent communications to stakeholders and promoting fiscal responsibility and stewardship.

DISCUSSION

On November 19, 2020, Brown Armstrong presented the June 30, 2020 audit results to the Audit Committee. The presentation included significant audit matters required by professional standards, and the audit results.

Brown Armstrong rendered an unmodified (or "clean") opinion on SCERS' financial statements. There were no comments and recommendations resulting from the June 30, 2020 audit.

FINANCIAL HIGHLIGHTS

- SCERS' net position restricted for pension benefits as of June 30, 2020 totaled \$9,979.4 million, an increase of \$157.7 million or 1.6% from the \$9,821.7 million in net position as of June 30, 2019. The increase in net position was due to investment earnings offset to some degree by the increase in benefit payments.
- For the fiscal year ended June 30, 2020, SCERS' total fund gross return of 2.9% was 1.4% higher than the investment policy benchmark return of the of 1.5%. During fiscal year 2019-20, investments with the strongest returns came from U.S. equity, U.S. fixed

income, and private equity investments. Net investment income after investment fees and expenses was \$301.4 million for the fiscal year ended June 30, 2020.

- As of June 30, 2020, SCERS' total pension liability was \$12.7 billion, up from \$11.9 billion as of June 30, 2019. The employers' net pension liability was \$2.7 billion as of June 30, 2020, which increased from \$2.1 billion as of June 30, 2019. The increase in employers' net pension liability is mainly due to changes in actuarial assumptions resulting from the most recent triennial experience study for the period ended June 30, 2019, and unfavorable investment return because of the COVID-19 pandemic, which had significant impact on the economy and the financial markets. The fiduciary net position as a percentage of the total pension liability decreased to 78.6% as of June 30, 2020, from 82.6% as of June 30, 2019.
- For the fiscal year ended June 30, 2020, the combined employer and member contributions were \$402.6 million, which represented a decrease of \$4.8 million, or 1.2% compared to the fiscal year ended June 30, 2019. The decrease is primary due to the recognition of approximately \$45.0 million in employer contributions related to the estimated unfunded actuarial accrued liability (UAAL) for a withdrawn employer in fiscal year ended 2018-19 compared to recognizing \$1.9 million, which represented the changes in estimated UAAL in fiscal year ended 2019-20. The decrease in contributions was also offset by an overall increase in employer and member contribution rates in fiscal year ended 2019-20.
- For the fiscal year ended June 30, 2020, total deductions of \$549.2 million comprised of benefit payments, withdrawal of contributions, and administrative expenses. Total deductions increased by \$35.8 million, or 7.0%, in the fiscal year ended June 30, 2020. The primary cause of the increase was due to the increase in monthly benefit payments resulting from an increase in the number of retired members and the annual cost-of-living adjustment paid to retirees and beneficiaries.

ATTACHMENTS

- Comprehensive Annual Financial Report with Independent Auditor's Report
- Report to the Audit Committee and Board of Retirement
 - Required Communication to the Members of the Audit Committee and Board of Retirement in Accordance with Professional Standards (SAS 114)

Board of Retirement
Sacramento County Employees' Retirement System
980 9th Street, Suite 1900
Sacramento, CA 95814

Dear Board Members:

As Chief Executive Officer of the Sacramento County Employees' Retirement System (SCERS or the System), I am pleased to present this Comprehensive Annual Financial Report (CAFR or the Report) for the fiscal years ended June 30, 2020 and 2019.

The System

SCERS is a cost-sharing multiple-employer public employee retirement system, enacted and administered in accordance with the provisions of the County Employees Retirement Law of 1937 (California Government Code Section 31450, et seq) (1937 Act) and the California Public Employees' Pension Reform Act of 2013 (PEPRA). Since its establishment by the Sacramento County Board of Supervisors in 1941, SCERS has provided retirement, disability, and survivors' benefits to eligible participants of the System Under Article XVI, Section 17 of the Constitution of the State of California, the SCERS Board of Retirement (the Board) is vested with plenary authority and fiduciary responsibility for the investment of monies and the administration of the System. Together, the provisions of the State Constitution and the 1937 Act establish SCERS as a separate and independent governmental entity from the public employers that participate in SCERS. At June 30, 2020, the County of Sacramento (and its Elected Officials); Superior Court of California, County of Sacramento; and nine Special Districts participated in SCERS.

The Comprehensive Annual Financial Report

Responsibility for both the accuracy of the data and the completeness and fairness of the presentation in this CAFR rests with the management of the System. To the best of management's knowledge and belief, the enclosed data is accurate in all material respects and is reported in a manner designed to present fairly the financial position and results of operations of the System.

I trust that readers of this Report and participants of the System will find this information helpful in understanding SCERS and its commitment to financial integrity and participant service.

Accounting System and Reports

Management of SCERS is responsible for establishing and maintaining internal controls designed to ensure that the System's assets are protected from loss, theft, or misuse. Responsibility for the accuracy, completeness, and fair presentation of information, and all disclosures in this CAFR and in the System's records, rests with SCERS' management. Brown Armstrong Accountancy Corporation, a certified public accounting firm, has audited the financial statements and related disclosures. The financial statement audit provides reasonable assurance that SCERS' financial statements are presented in conformity with accounting principles generally accepted in the United States and are free from material misstatements. The internal controls are designed to provide reasonable, but not absolute, assurance that these objectives are met. The concept of reasonable assurance recognizes that: (1) The cost of a control should not exceed the benefits likely to be derived; and (2) The assessment of costs and benefits requires estimates and judgments by management.

This report has been prepared in accordance with generally accepted accounting principles (GAAP) as promulgated by the Governmental Accounting Standards Board (GASB). GAAP requires that management provide a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of management's discussion and analysis (MD&A). This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it. The System's MD&A can be found immediately following the independent auditor's report.

Investments – General Authority and SCERS

Article XVI, Section 17 of the Constitution of the State of California provides that "...notwithstanding any other provisions of law or this Constitution, the Retirement Board of a public pension or retirement system shall have plenary authority and fiduciary responsibility for investment of monies and administration of the system..." Article XVI, Section 17(a) further provides that "...the Retirement Board of a public pension or retirement system shall have sole and exclusive fiduciary responsibility over the assets..."

SCERS maintains an overall investment policy designed to achieve a diversified investment portfolio. An integral part of the investment policy is the strategic asset allocation, which is designed to provide an optimal mix of asset classes with return expectations that correspond to expected liabilities. The strategic asset allocation also emphasizes maximum diversification of the portfolio to protect the System from the possibility that a particular asset class may experience poor investment performance in a given period.

The current strategic asset allocation model was established as a result of an asset allocation study conducted in the 2016-17 fiscal year. SCERS' strategic asset allocation views risk exposures through multiple lenses, including functional and common factor exposures, in order to manage and maintain allocations that are aligned with SCERS' investment philosophy and objectives. This multiple lens approach uses a functional framework to group and classify segments of SCERS' portfolio in order to link segments that are exposed to similar economic environments and risk factors, and which would be expected to have similar roles and outcomes in a portfolio. The functional grouping takes a simplified approach at the asset category level, by breaking the portfolio into five asset categories, with greater complexity reserved at the asset class level. The asset categories include: (1) Growth, (2) Diversifying, (3) Real Return, (4) Opportunities, and (5) Cash.

SCERS' strategic asset allocation has heavy allocations to growth assets that can drive returns. However, it also maintains meaningful diversification, especially to investment strategies with low and negative correlations to equity markets that can reduce portfolio volatility and protect against significant market drawdowns. It is also expected to generate meaningful cash flow for SCERS.

For the fiscal year ended June 30, 2020, SCERS' investments provided a 2.9% rate of return (gross of fees), compared to the investment policy benchmark return of 1.5%.

More detailed information regarding SCERS' strategic asset allocation, professional investment advisors, and investment performance can be found in the Investment Section of this Report.

Actuarial Funding Status

SCERS' overall funding objective is to meet long-term benefit promises by maintaining a well-funded plan status through a combination of superior investment returns and employer and member contributions, which are both minimized and maintained as level as possible for each generation of active members. The greater the level of overall plan funding, the larger the ratio of assets accumulated to the actuarial accrued liability and the greater the investment potential. The advantage of a well-funded plan is that the benefits earned by participants are funded during their working careers and not by future generations of taxpayers.

To help reduce year-to-year volatility in employer contribution rates due to fluctuations in investment performance, SCERS smooths the calculation of actuarial assets over a rolling seven-year period. This not only stabilizes contribution rates, but also improves the ability of the employer to plan for possible future increases or decreases in the contribution rates.

SCERS engaged an independent actuarial consulting firm, Segal, to conduct its annual actuarial valuation as of June 30, 2020. Triennially, the System requests that its actuary perform an analysis of the appropriateness of all economic and non-economic assumptions. The most recent triennial analysis was performed as of June 30, 2019, and as a result of that analysis, the Board approved certain changes to the actuarial assumptions, which were incorporated in the actuarial valuation as of June 30, 2020. Most significantly, the Board adopted a 6.75% assumed rate of return, a decrease from 7%.

At June 30, 2020, SCERS' funding ratio on a market (fair) value of assets basis was 78.6%. On an actuarial basis, the funding ratio was 80.6%, with the actuarial value of assets totaling \$10.2 billion and the actuarial accrued liability totaling \$12.7 billion. Deferred losses under the smoothing methodology exceeded deferred gains by \$250.4 million as of June 30, 2020, decreased from \$118.4 million in gains as of June 30, 2019. Deferred investment gains/(losses) are recognized over a rolling seven-year period.

Budget

The Board approves SCERS' annual budget. The 1937 Act limits SCERS' annual administrative expenses, excluding the costs of administration for computer software and hardware and computer technology consulting services (IT costs), to twenty-one hundredths of one percent (0.21%) of the System's actuarial accrued liability. SCERS' administrative expenses have historically been below the limitation. Administrative expenses, excluding IT costs, were \$7.9 million and \$7.3 million for the fiscal years ended June 30, 2020 and June 30, 2019, respectively. SCERS administrative expenses for both years were .06% of the System's actuarial accrued liability.

Significant Activities

SCERS developed a Strategic Management Program that includes an annual planning process for specific actions SCERS staff will take during the fiscal year to accomplish the continuous improvement of the enterprise, with improved processes for measuring and tracking performance. The resulting plan is organized around six key themes. The following are significant activities that occurred during the fiscal year:

CUSTOMER SERVICE AND EXPERIENCE

- Maintained target service levels for retirement application processing times in work-from-home environment during pandemic
- Launched customer satisfaction survey for new retirees
- Reduced backlog of disability-retirement applications

STAKEHOLDER COMMUNICATION AND OUTREACH

- Shifted in-person retirement seminars to webinars and expanded web-based education materials and videos
- Provided timely information to members and employers on COVID-19 impacts on retirement services and policies
- Updated key Board policies regarding post-retirement employment and Board elections
- Conducted second annual employer forum

FUNDING INTEGRITY AND SUSTAINABILITY

- Conducted triennial Experience Study and adopted new actuarial assumptions to improve long-term stability of fund
- Produced second annual “risk report” that analyzed contribution rate volatility and funding sensitivity
- Adopted operating budget that reduces expenses by 2%
- Secured funding agreement with former employer, UC Davis Medical Center

INVESTMENT PLANNING AND GROWTH

- Added 1% cash allocation and converted 2% Commodities allocation to a 2% Liquid Real Return allocation
- Created a cash management policy to identify processes and tools to assist SCERS in the management of cash and monitoring of liquidity
- Adjusted market exposures of asset categories to align with the strategic asset allocation
- Issued a Request for Proposal (RFP) for alternative assets consulting
- Conducted Board education in key areas of proxy voting, liquidity, and portfolio rebalancing

ORGANIZATIONAL DEVELOPMENT AND CULTURE

- Transitioned to work-from-home environment without business disruption
- Maintained hiring during office closure to fill key support-staff positions
- Continued to reduce year-over-year overtime

ENTERPRISE CAPABILITY AND TECHNOLOGY

- Increased use of targets and performance measurement data in Strategic Management Program
- Completed user-acceptance testing for upcoming phases of Ariel (Pension Administration System)
- Increased staff “ownership” of Ariel and new process changes, reducing reliance on vendors
- Onboarded new service provider for Investment Accounting System and Investment Portfolio Company Reporting

Certificate of Achievement

The Government Finance Officers Association of the United States and Canada (GFOA) awarded the Certificate of Achievement for Excellence in Financial Reporting to SCERS for its CAFR for the fiscal years ended June 30, 2019 and 2018. In order to be granted this national award, a governmental entity must publish an easily readable and efficiently organized CAFR that meets the highest standards of governmental financial reporting. This was the twenty-first consecutive year that SCERS has received this prestigious award.

A Certificate of Achievement is valid for a period of one year. Management believes that this current CAFR continues to meet the requirements for earning a Certificate of Achievement, and it will be submitted to the GFOA for consideration of the award.

SCERS also received the GFOA Award for Outstanding Achievement in Popular Annual Financial Reporting for the fiscal year ended June 30, 2019. This was the eleventh consecutive year SCERS has received this award.

Acknowledgements

This Report is intended to provide complete and reliable information with respect to the responsible stewardship of SCERS. The compilation of this Report is a product of the combined and dedicated effort of the System’s staff. This Report is also a reflection of the leadership of the SCERS Board in assuring the prudent fiduciary oversight of SCERS. I would like to take this opportunity to express my thanks to the SCERS Board, Staff, and advisors for their commitment to SCERS and for working so diligently to ensure the successful operation of the System.

Respectfully submitted,

Eric Stern

INDEPENDENT AUDITOR'S REPORT

BROWN ARMSTRONG

Certified Public Accountants

INDEPENDENT AUDITOR'S REPORT

To the Audit Committee and Board of Retirement of the
Sacramento County Employees' Retirement System
Sacramento, California

Report on the Financial Statements

We have audited the accompanying Statements of Fiduciary Net Position of the Sacramento County Employees' Retirement System (SCERS) as of June 30, 2020 and 2019, the related Statements of Changes in Fiduciary Net Position for the fiscal years then ended, and the related notes to the financial statements, which collectively comprise SCERS' basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to SCERS' preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of SCERS' internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

WWW.BACPAS.COM

REGISTERED with the Public Company
Accounting Oversight Board and
MEMBER of the American Institute of
Certified Public Accountants

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the fiduciary net position of SCERS as of June 30, 2020 and 2019, and the changes in fiduciary net position for the fiscal years then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and required supplementary information (RSI), as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the management's discussion and analysis and RSI in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise SCERS' basic financial statements. The other supplemental information and the introductory, investment, actuarial, and statistical sections, as listed in the table of contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The other supplemental information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the other supplemental information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory, investment, actuarial, and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated November 23, 2020, on our consideration of SCERS' internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, agreements, and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of SCERS' internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering SCERS' internal control over financial reporting and compliance.

MANAGEMENT'S DISCUSSION AND ANALYSIS

This section presents management's discussion and analysis (MD&A) of the financial activities of the Sacramento County Employees' Retirement System (SCERS, the System, or the Plan) for the fiscal years ended June 30, 2020 and 2019. Readers are encouraged to consider the narrative overview and information presented in this MD&A in conjunction with the Letter of Transmittal beginning on page 6 of this report and the Basic Financial Statements, Notes to the Basic Financial Statements, Required Supplementary Information, and Other Supplemental Information that follow.

FINANCIAL HIGHLIGHTS

As of June 30, 2020, SCERS' fiduciary net position restricted for pension benefits (net position) totaled \$9,979.4 million. This represented an increase of \$157.7 million, or 1.6%, from the \$9,821.7 million in SCERS' net position as of June 30, 2019, which, in turn, represented an increase of \$569.8 million, or 6.2%, over the \$9,251.9 million in net position as of June 30, 2018.

Additions to net position were \$706.9 million, \$1.083 billion, and \$1.143 billion for the fiscal years ended June 30, 2020, 2019 and 2018, respectively. The total additions for the fiscal year ended June 30, 2020 decreased by \$376.3 million, or 34.7%, over the fiscal year ended June 30, 2019, which in turn, saw a decrease in total additions of \$59.7 million, or 5.2%, over the fiscal year ended June 30, 2018. Lower investment performance was the primary reason for the decrease in additions for both years.

Deductions from net position were \$549.2 million, \$513.4 million, and \$475.2 million for the fiscal years ended June 30, 2020, 2019 and 2018, respectively. The total deductions for the fiscal year ended June 30, 2020 increased by \$35.8 million, or 7.0%, over the fiscal year ended June 30, 2019, which in turn, saw an increase in total deductions of \$38.2 million, or 8.0%, over the fiscal year ended June 30, 2018. Increased monthly benefit payments due to an increase in the number of retirees and the annual cost-of-living adjustment were the primary reasons for the increase in total deductions for both years.

SCERS' funding objective is to meet long-term benefit obligations through contributions and investment earnings. In order to help achieve level and predictable contribution costs from one year to the next, SCERS bases the determination of contribution rates on an actuarial asset valuation method that gradually adjusts to the market (fair) value of assets (asset smoothing). Under this actuarial asset valuation methodology, any investment market returns for the fiscal year that are above or below the assumed investment return rate (7.0% which was used to determine the contribution rates for the fiscal years ended June 30, 2020 and 2019) are recognized over seven years (the asset smoothing period). This smoothed value is referred to as the Actuarial Value of Assets. By using the Actuarial Value of Assets to determine the contribution rates, SCERS is able to lower the year-to-year volatility in contribution rates that would come from using the fair value of assets.

As of June 30, 2020, SCERS' total pension liability was \$12.694 billion, up from \$11.896 billion as of June 30, 2019. The employers' net pension liability was \$2.714 billion as of June 30, 2020, which increased from \$2.074 billion as of June 30, 2019. The increase in employers' net pension liability is mainly due to changes in actuarial assumptions resulting from the most recent triennial experience study for the period ended June 30, 2019 and unfavorable investment return because of the COVID-19 pandemic, which changed the market conditions in 2020. The fiduciary net position as a percentage of total pension liability decreased to 78.6% as of June 30, 2020, from 82.6% as of June 30, 2019.

OVERVIEW OF THE FINANCIAL STATEMENTS

This MD&A serves as an introduction to the basic financial statements and other information accompanying the basic financial statements, which are comprised of the following components:

- Statements of Fiduciary Net Position - Pension Trust Fund
- Statements of Changes in Fiduciary Net Position - Pension Trust Fund
- Statements of Fiduciary Net Position - Agency Fund
- Notes to the Basic Financial Statements

The Statements of Fiduciary Net Position - Pension Trust Fund are snapshots of account balances at fiscal year-end. These statements reflect assets available for future payments to retirees and their beneficiaries, and liabilities owed as of fiscal year end.

The Statements of Changes in Fiduciary Net Position - Pension Trust Fund reflect all the financial transactions that occurred during the fiscal year and show the impact of those activities as additions to or deductions from the Plan. The trend of additions to versus deductions from the Plan will indicate whether SCERS' financial position is improving or deteriorating over time.

The fiduciary fund statements report SCERS' net position restricted for pension benefits. Over time, increases or decreases in net position serve as one indicator of whether SCERS' financial health is improving or deteriorating. Other factors, such as market conditions or the System's fiduciary net position as a percentage of the employers' total pension liability, should also be considered in measuring the System's overall health.

The Statements of Fiduciary Net Position - Agency Fund reflect assets held by SCERS in a custodial capacity or as an agent on behalf of others and do not measure the results of operations.

The Notes to the Basic Financial Statements are an integral part of the financial reports and provide additional information that is essential for a full understanding of the data provided in the financial statements.

In addition to the financial statements and accompanying notes, this report presents certain **Required Supplementary Information** which includes the employers' changes in net pension liability and related ratios, actuarially determined contributions (ADC), actuarial assumptions used to calculate the ADC, historical money-weighted rate of return and other required supplementary information related to SCERS' defined benefit pension plan as required by GASB Statement No. 67.

Schedules of administrative expenses, investment fees and expenses, payments to consultants, and statements of changes in assets and liabilities for the agency fund are presented as **Other Supplemental Information** following the Required Supplementary Information.

FINANCIAL ANALYSIS

Net Position

SCERS' net position restricted for pension benefits as of June 30, 2020 totaled \$9,979.4 million, an increase of \$157.7 million or 1.6% from the \$9,821.7 million in net position as of June 30, 2019, which represented an increase of \$569.8 million or 6.2% from the \$9,251.9 million in net position as of June 30, 2018. The increase in net position for the fiscal years ended June 30, 2020 and 2019 was due to investment income offset to some degree by the benefits and expenses paid during the fiscal year exceeding the contributions received.

For the fiscal year ended June 30, 2020, the total fund return, gross of fees, of 2.9% was 1.4% higher than the return of the investment policy benchmark of 1.5%. During fiscal year 2019-20, investments with the strongest returns came from U.S. equity, U.S. fixed income, and private equity investments.

For the fiscal year ended June 30, 2019, the total fund return, gross of fees, of 7.2% was 0.9% higher than the return of the investment policy benchmark of 6.3%. While the majority of asset classes generated positive returns during fiscal year 2018-19, investments in the equity, real assets and private equity segments outperformed the policy benchmarks.

In fiscal year ended June 30, 2020, the decrease in cash and short-term investments was offset by the increase in other cash and cash equivalents due to the dedicated 1% target allocation to cash per the approved asset allocation policy. The increase in cash and short-term investments as of fiscal year ended June 30, 2019 was due to increases in trading activities of short-term investments at year-end. The increase in receivables and investment purchases and other as of June 30, 2020 and 2019 was the result of increase in trading activity at year-end by the external investment managers. The decrease in securities lending collateral and securities lending liability as of June 30, 2020 and 2019 reflected a lower level of activity in the securities lending industry.

* Certain amounts have been reclassified to be consistent with the current year presentation.

GASB Statement No. 67 replaced GASB Statement No. 25 and redefined pension liability and expense for financial reporting purposes but does not apply to contribution amounts for pension funding purposes. When measuring the total pension liability, GASB uses the same actuarial cost method and the same type of discount rate as SCERS uses for funding. Therefore, the employers' total pension liability measured for financial reporting shown in this report is determined on the same basis as SCERS' actuarial accrued liability measured for funding.

SCERS retains an independent actuarial firm, Segal, to perform the annual actuarial valuations to determine the employers' total pension liability (expected future benefits) and ADC. The annual actuarial valuation measures the current and projected assets and liabilities of the retirement system, as well as the System's funded status. This information forms the basis for establishing the actuary's recommendations for the employer and member contribution rates for the upcoming fiscal year to pay the expected future benefits.

As of June 30, 2020, the employers' total pension liability was \$12.694 billion, and the net pension liability (the total pension liability less the Plan's fiduciary net position) was \$2.714 billion. The Plan's fiduciary net position as a percentage of the total pension liability was 78.6%. In general terms, this ratio means that as of June 30, 2020, SCERS had approximately 79 cents available for each dollar of anticipated future liability. As of June 30, 2019, the employers' total pension liability was \$11.896 billion, and the net pension liability was \$2.074 billion. The Plan's fiduciary net position as a percentage of the total pension liability was 82.6%.

The Required Supplementary Information presents additional information regarding the net pension liability and the Actuarial Section of this report provides additional actuarial funding information.

Reserves

SCERS' reserves are established in accordance with the requirements of the 1937 Act, utilizing contributions and the accumulation of investment income, after recognition of administrative and investment expenses. Under GASB Statement No. 67, investments are stated at fair value instead of cost and include the recognition of unrealized gains and losses. However, for actuarial funding purposes, SCERS utilizes a seven-year smoothing methodology under which a portion of the market gains and losses is recognized and allocated to the reserves through interest crediting. The difference between the fair value of assets (equivalent to the net position restricted for pension benefits) and the smoothed actuarial value of assets is tracked in the market stabilization reserve.

Lower than expected investment performance reduced SCERS' market stabilization reserve from \$118.4 million as of June 30, 2019 to negative \$250.4 million as of June 30, 2020.

The following table presents a reserve summary for the fiscal years ended June 30, 2020, 2019, and 2018, respectively:

NET POSITION RESTRICTED FOR PENSION BENEFITS AT JUNE 30

(Dollar Amounts Expressed in Millions)

Additions to Net Position

Financing for the benefits SCERS provides to its members comes primarily through the collection of employer and member contributions and from investment earnings. For the fiscal years ended June 30, 2020, 2019, and 2018, total additions were \$706.9 million, \$1,083.2 million, and \$1,142.9 million, respectively.

For the fiscal years ended June 30, 2020, 2019, and 2018, combined employer and member contributions were \$402.6 million, \$407.4 million, and \$298.4 million, respectively. The decrease in employer and member contributions for the fiscal year ended June 30, 2020 of \$4.8 million, or 1.2%, over the fiscal year ended June 30, 2019 was due to SCERS recognized approximately \$45.0 million in employer contributions related to the estimated unfunded actuarial accrued liability (UAAL) for a withdrawn employer in 2019 compared to recognizing \$1.9 million, which represented the changes in estimated UAAL in fiscal year 2020. The decrease in contributions was offset by an overall increase in employer and member contribution rates. The increase in employer and member contributions for the fiscal year ended June 30, 2019 of \$109.0 million, or 36.5%, over the fiscal year ended June 30, 2018 was attributed to SCERS recognized approximately \$45.0 million in employer contributions related to the estimated UAAL payable from a withdrawn employer and in addition to an overall increase in employer and member contributions.

Net investment income after investment fees and expenses was \$301.4 million, \$672.9 million, and \$841.4 million for the fiscal years ended June 30, 2020, 2019, and 2018, respectively. The net investment gains and losses were driven primarily by investment performance of the portfolio. The Investment Section of this report provides a detailed discussion of the investment markets and investment performance.

Deductions from Net Position

SCERS' net position was primarily used for the payment of benefits to members and their beneficiaries, for the payment of contribution refunds to terminated employees, and for the cost of administering the System. For the fiscal years ended June 30, 2020, 2019, and 2018, total deductions were \$549.2 million, \$513.4 million, and \$475.2 million, respectively.

Deductions increased by \$35.8 million, or 7.0%, in the fiscal year ended June 30, 2020 and by \$38.2 million, or 8.0%, in the fiscal year ended June 30, 2019. The primary cause of the increase in deductions in both years was due to the increase in monthly benefit payments resulting from an increase in the number of retired members and the annual cost-of-living adjustment paid to retirees and beneficiaries.

The Board of Retirement approves SCERS' annual administrative budget. The 1937 Act limits SCERS' annual administrative expenses, excluding the costs of administration for computer software and hardware and computer technology consulting services (IT costs), to twenty-one hundredths of one percent (0.21%) of the System's actuarial accrued liability. Administrative expenses of \$7.9 million and \$7.3 million for the fiscal years ended June 30, 2020 and June 30, 2019, excluding IT costs for both years, were 0.06% of the System's actuarial accrued liability. SCERS' administrative expenses have historically been below the limitation.

CURRENTLY KNOWN FACTS, CONDITIONS, OR DECISIONS

On July 30, 2020, the California Supreme Court issued a decision in the case of Alameda County Deputy Sheriffs' Association et al. v. Alameda County Employees' Retirement Association and Board of Retirement of ACERA ("Alameda"). That decision has important implications for SCERS and its members. Foremost, the Court upheld the constitutionality of certain amendments the Legislature made to the County Employees' Retirement Law of 1937. Those amendments, now approved by the Court, require county pension systems to exclude certain pay elements from pension calculations for members who retired on or after January 1, 2013. SCERS is continuing to evaluate the impact of the decision on individual members and will be making corrections during the 2020-21 fiscal year; however, SCERS does not believe that the contribution and pension payment adjustments, in aggregate, will be material to the System.

SCERS' FIDUCIARY RESPONSIBILITIES

SCERS' Board of Retirement and management staff are fiduciaries of the pension trust fund. Under the California Constitution and California state law, the net position must be used exclusively for the benefit of plan participants and their beneficiaries.

REQUESTS FOR INFORMATION

This report is designed to provide the Board of Retirement, SCERS members, participating employers, taxpayers, and other stakeholders and interested parties with a general overview of SCERS' finances and to show accountability for the money SCERS receives.

Questions about this report or requests for additional financial information may be addressed to:

Sacramento County Employees' Retirement System

NOTES TO THE BASIC FINANCIAL STATEMENTS

(Dollar Amounts Expressed in Thousands)

NOTE 1 - PLAN DESCRIPTION

The Sacramento County Employees' Retirement System (SCERS, the System, or the Plan) is a cost-sharing multiple-employer defined benefit pension plan, which operates under the County Employees Retirement Law of 1937 (Section 31450 et seq of the California Government Code) (1937 Act) and the California Public Employees' Pension Reform Act of 2013 (PEPRA). The System was created by resolution of the Sacramento County (the County) Board of Supervisors on July 1, 1941, to provide retirement, disability, and death benefits for qualified employees of the County and participating Special Districts (Special Districts or Member Districts). SCERS is governed by a nine member Board of Retirement. Four are appointed by the County Board of Supervisors; four are elected by the members of the System (two by the Miscellaneous members, one by the Safety members and one by the Retiree members); and the County Director of Finance serves as an Ex-Officio member. An alternate Safety member and an alternate Retiree member are also elected by those respective member groups. The System is legally and fiscally independent of the County.

At June 30, 2020 and 2019, participating local government employers consisted of the County of Sacramento (and its Elected Officials); Superior Court of California, County of Sacramento (Superior Court); and nine special districts.

The System's membership consists of the following categories:

- Safety Tier 1 - Includes employees whose principal duties consist of law enforcement or fire suppression work or who occupy positions designated by law as safety positions and who have a membership start date prior to June 25, 1995.
- Safety Tier 2 - Includes employees whose principal duties consist of law enforcement or fire suppression work or who occupy positions designated by law as safety positions and who have a membership start date on or after June 25, 1995 but prior to January 1, 2012.
- Safety Tier 3 - Includes employees whose principal duties consist of law enforcement or fire suppression work or who occupy positions designated by law as safety positions and who have a membership start date on or after January 1, 2012 but prior to January 1, 2013.
- Safety Tier 4 - Includes employees whose principal duties consist of law enforcement or fire suppression work or who occupy positions designated by law as safety positions and who have a membership start date on or after January 1, 2013.
- Miscellaneous Tier 1 - Includes all members other than Safety who have a membership start date prior to September 27, 1981.
- Miscellaneous Tier 2 - Includes all members other than Safety who have a membership start date on or after September 27, 1981, and prior to June 27, 1993, and who elected not to become members of Miscellaneous Tier 3.
- Miscellaneous Tier 3 - Includes all members other than Safety who have a membership start date on or after June 27, 1993, and those Miscellaneous Tier 2 members who elected to become members of this class. The Miscellaneous Tier 3 is closed to employees of Sacramento County who have a membership start date on or after January 1, 2012.
- Miscellaneous Tier 4 - Includes members other than Safety who are employees of Sacramento County and have a membership start date on or after January 1, 2012 but prior to January 1, 2013.
- Miscellaneous Tier 5 - Includes all members other than Safety who have a membership start date on or after January 1, 2013.

NOTES TO THE BASIC FINANCIAL STATEMENTS (CONTINUED)

(Dollar Amounts Expressed in Thousands)

Pension Benefits

The System's benefits are established by the provisions of the 1937 Act and PEPRA and provide for retirement, death, and disability benefits. All permanent full-time and part-time employees of the County, Superior Court and Special Districts are eligible to participate in the System. Upon reaching five years of service, participants have earned the right to receive a retirement benefit, subject to certain restrictions if retirement is prior to attaining age 50 or if less than 10 years of service has been achieved for Miscellaneous Tiers 1, 2, 3 and 4 and Safety Tiers 1, 2, and 3, or prior to attaining age 52 or if less than 5 years of service has been achieved for Miscellaneous Tier 5, or prior to attaining age 50 or if less than 5 years of service has been achieved for Safety Tier 4.

Effective June 29, 2003, the County Board of Supervisors adopted new benefit formulas for all SCERS members, including the employees of Special Districts, for service credit prospectively from June 29, 2003, and for County employees, retroactively to service credit which precedes that date. In accordance with applicable retirement law, each SCERS Special District's governing body determined whether or not to apply these formulas retroactively for service credit earned prior to June 29, 2003 by their employees.

Retirement benefits under Safety Tiers 1 and 2 and Miscellaneous Tiers 1, 2 and 3 are as follows:

- Members covered under Safety Tier 1 who retire at age 50, or thereafter, are entitled to a retirement benefit, payable monthly for life, equal to 3 percent of their final average salary for each year of credited service. This benefit includes a cost-of-living adjustment of up to 4 percent annually. Final average salary is the member's average salary for the highest twelve consecutive months of credited service.
- Members covered under Safety Tier 2 who retire at age 50, or thereafter, are entitled to a retirement benefit, payable monthly for life, equal to 3 percent of their final average salary for each year of credited service. This benefit includes a cost-of-living adjustment of up to 2 percent annually. Final average salary is the member's average salary for the highest thirty-six consecutive months of credited service.
- Members covered under Miscellaneous Tier 1 who retire at age 50 are entitled to a retirement benefit, payable monthly for life, equal to 1.48 percent of their final average salary for each year of credited service. This benefit includes a cost-of-living adjustment of up to 4 percent annually. Final average salary is the member's average salary for the highest twelve consecutive months of credited service.
- Members covered under Miscellaneous Tier 2 who retire at age 50 are entitled to a retirement benefit, payable monthly for life, equal to 1.48 percent of their final average salary for each year of credited service. There is no cost-of-living adjustment. Final average salary is the member's average salary for the highest thirty-six consecutive months of credited service.
- Members covered under Miscellaneous Tier 3 who retire at age 50 are entitled to a retirement benefit, payable monthly for life, equal to 1.48 percent of their final average salary for each year of credited service. This benefit includes a cost-of-living adjustment of up to 2 percent annually. Final average salary is the member's average salary for the highest thirty-six consecutive months of credited service.

The retirement benefits of Miscellaneous Tiers 1, 2, and 3 members who retire after age 50 are increased by an age factor for each quarter year of age up to a maximum of 2.61 percent of final average salary for each year of credited service at age 62.

NOTES TO THE BASIC FINANCIAL STATEMENTS (CONTINUED)

(Dollar Amounts Expressed in Thousands)

Members whose employers determined not to retroactively apply the formulas to service credit earned prior to June 29, 2003 will continue to have their retirement benefits for that service calculated pursuant to the formulas in effect at the time the service was earned (i.e., Safety and Miscellaneous members who retire at age 50 earn 2 percent and 1.1 percent, respectively, of their final average salary for each year of credited service).

Effective January 1, 2012, the County Board of Supervisors adopted new tiers for County employees hired on or after January 1, 2012, but before January 1, 2013. Retirement benefits under these tiers are as follows:

- Members covered under Safety Tier 3 who retire at age 50 are entitled to a retirement benefit, payable monthly for life, equal to 2.29 percent of their final average salary for each year of credited service. This benefit includes a cost-of-living adjustment of up to 2 percent annually. Final average salary is the member's average salary for the highest thirty-six consecutive months of credited service.
- Members covered under Miscellaneous Tier 4 who retire at age 50 are entitled to a retirement benefit, payable monthly for life, equal to 1.18 percent of their final average salary for each year of credited service. This benefit includes a cost-of-living adjustment of up to 2 percent annually. Final average salary is the member's average salary for the highest thirty-six consecutive months of credited service.

The retirement benefits of Safety Tier 3 members who retire after age 50 are increased by an age factor for each quarter year of age up to a maximum of 3 percent of final average salary for each year of credited service at age 55. The retirement benefits of Miscellaneous Tier 4 members who retire after age 50 are increased by an age factor for each quarter year of age up to a maximum of 2.43 percent of final average salary for each year of credited service at age 65.

Effective January 1, 2013, with the implementation of PEPRA, the County Board of Supervisors adopted new tiers for employees of the County, Superior Court and Special Districts who are eligible to participate in the System and who were hired on or after January 1, 2013. Retirement benefits under these new tiers are as follows:

- Members covered under Safety Tier 4 who retire at age 50 are entitled to a retirement benefit, payable monthly for life, equal to 2 percent of their final average salary for each year of credited service. This benefit includes a cost-of-living adjustment of up to 2 percent annually. Final average salary is the member's average salary for the highest thirty-six consecutive months of credited service.
- Members covered under Miscellaneous Tier 5 who retire at age 52 are entitled to a retirement benefit, payable monthly for life, equal to 1 percent of their final average salary for each year of credited service. This benefit includes a cost-of-living adjustment of up to 2 percent annually. Final average salary is the member's average salary for the highest thirty-six consecutive months of credited service.

The retirement benefits of Safety Tier 4 members who retire after age 50 are increased by an age factor for each quarter year of age up to a maximum of 2.7 percent of final average salary for each year of credited service at age 57. The retirement benefits of Miscellaneous Tier 5 members who retire after age 52 are increased by an age factor for each quarter year of age up to a maximum of 2.5 percent of final average salary for each year of credited service at age 67.

Member Termination

Upon separation from employment with a participating employer, members' accumulated contributions are refundable with interest accrued through the prior six-month period ended June 30 or December 31. Interest on member accounts is credited semiannually on June 30 and December 31. Withdrawal of such accumulated contributions results in forfeiture of the related benefits.

NOTES TO THE BASIC FINANCIAL STATEMENTS (CONTINUED)

(Dollar Amounts Expressed in Thousands)

Financing

Benefits payable by the System are financed through member contributions, employer contributions, and earnings from investments. Member contributions are required by law. Contribution rates, which are actuarially determined, are based on age at entry into the System (a single rate is used for members entering the System after January 1, 1975). County, Superior Court and Special Districts' contributions are actuarially determined to provide for the balance of contributions needed to fund benefits. All contribution rates are reviewed and revised annually. The authority for both benefit provisions and contribution obligations is derived from the 1937 Act and PEPRA.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

SCERS reports fiduciary funds at June 30, 2020 and 2019, which include pension trust and agency funds. The pension trust fund is used to report resources that are required to be held in trust for the members and beneficiaries of the defined benefit pension plan, and the agency fund accounts for assets held by SCERS in a custodial capacity or as an agent on behalf of the participating employers to fund the Retiree Medical and Dental Insurance Program. See Note 8 for a detailed description of the program. The pension trust fund is accounted for on a flow of economic resources measurement focus and the accrual basis of accounting. The agency fund is custodial in nature and does not measure the results of operations. Assets and liabilities are recorded using the accrual basis of accounting.

Basis of Accounting

The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America and reporting guidelines set forth by the Governmental Accounting Standards Board (GASB).

Valuation of Investments

The majority of the investments held at June 30, 2020 and 2019, are in the custody of, or controlled by, State Street Bank, the System's custodian bank. The System's investment portfolio consists of domestic and international equities, domestic and international fixed income, real assets, real estate, absolute return, private credit, and private equity. The diversity of the System's investment portfolio requires a wide range of techniques to determine fair value. Investments are valued at their fair values in accordance with GASB Statement No. 72, *Fair Value Measurement and Application*, which results in the recognition of fair value gains and losses. See Note 3, Section 2 for disclosures related to investment classification and valuation.

Contributions and Benefits

Member and employer contributions are recognized when due pursuant to statutory requirements. Benefits and refunds are recognized when the benefits are currently due and payable in accordance with the terms of the Plan.

Income and Expenses

Interest income is recognized as it accrues. Dividend income is recognized when the dividends are declared. Realized gains and losses and unrealized gains and losses on investments are combined and reported together as net appreciation (depreciation) in the fair value of investments. Expenses are recorded when the corresponding liabilities are incurred, regardless of when payment is made. Investment purchases and sales are recorded based on trade date accounting.

Securities Lending

Securities lending transactions are short-term collateralized loans of the System's securities for the purpose of generating additional investment income. For each lending transaction, the System receives either cash collateral or non-cash collateral. The underlying securities out on loan are reported on the System's Statements of Fiduciary Net Position as if the lending transactions had not occurred. Cash collateral received for the loaned securities is reported as securities lending obligation on the Statements of Fiduciary Net Position. Cash collateral is reinvested in the lending agent's cash collateral investment pool, is valued at fair value, and is reported as securities lending collateral on the Statements of Fiduciary Net Position. Non-cash collateral held is not reported on the Statements of Fiduciary Net Position nor is there a corresponding liability reported on the financial statements as the System does not have the ability to pledge or sell them without a borrower default. See Note 3, Section 3 for disclosures related to securities lending transactions.

Capital Assets

Capital assets are defined as assets with an initial individual cost of \$5 or more and an estimated useful life in excess of one year. Capital assets consist of furniture, building improvements, and intangible assets, which are recorded at cost on the Statements of Fiduciary Net Position, net of accumulated depreciation/amortization. Depreciation/amortization is charged to operations using the straight-line method on the estimated useful life of the related asset and is included in administrative expenses on the Statements of Changes in Fiduciary Net Position. Estimated useful lives for furniture and building improvements are depreciated over 10 years. Intangible assets for SCERS' IT Modernization Project will be depreciated over 10 years when it is ready for its intended use.

Other Assets

Other assets consist of other accounts receivable, prepaid expenses, and security deposits.

Administrative Expenses

Administrative costs are financed through employer and member contributions and earnings from investments.

Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Actual results could differ from those estimates.

Reclassification

Certain reclassifications have been made to June 30, 2019 balances to conform to the presentation as of and for the fiscal year ended June 30, 2020.

NOTES TO THE BASIC FINANCIAL STATEMENTS (CONTINUED)

(Dollar Amounts Expressed in Thousands)

NOTE 3 - CASH AND INVESTMENTS

SECTION 1: INVESTMENT POLICIES

Article XVI, Section 17 of the Constitution of the State of California provides that "...notwithstanding any other provisions of law or this Constitution, the Retirement Board of a public pension or retirement system shall have plenary authority and fiduciary responsibility for investment of monies and administration of the system..." Article XVI, Section 17(a) further provides that "...the Retirement Board of a public pension or retirement system shall have sole and exclusive fiduciary responsibility over the assets..." The investment authority for the System rests primarily through the "prudent person rule," as set forth in Section 31595 of the 1937 Act, which establishes a standard for all fiduciaries, including anyone with investment authority on behalf of the System.

Asset Allocation

SCERS maintains an overall investment policy designed to achieve a diversified investment portfolio. An integral part of the investment policy is the strategic asset allocation, which is designed to provide an optimal mix of asset classes with return expectations that correspond to expected liabilities. The strategic asset allocation also emphasizes maximum diversification of the portfolio to protect the System from the possibility that a particular asset class may experience poor investment performance in a given period. The System's adopted asset allocation policies as of June 30, 2020 and 2019 are as follows:

Asset Class	Target Allocation	
	2020	2019
Domestic Equity	20.0%	21.0%
International Equity	20.0	20.0
Fixed Income	20.0	20.0
Real Assets	7.0	9.0
Real Estate	7.0	7.0
Absolute Return	10.0	10.0
Private Credit	4.0	4.0
Private Equity	9.0	9.0
Liquid Real Return	2.0	-
Cash	1.0	-
	<u>100.0%</u>	<u>100.0%</u>

SECTION 2: INVESTMENT SUMMARY**Cash Invested with Sacramento County Treasurer**

The System invests cash held for benefit payments and general operations in the County Treasurer's pool. The County Treasury Oversight Committee is responsible for regulatory oversight of the pool. The System's share of the County Treasurer's pool is separately accounted for, and interest earned, net of related expenses, is apportioned quarterly based on the proportion of the System's average daily cash balance to the total of the pooled cash and investments.

The value of the System's pooled shares is determined on an amortized cost basis, which approximates fair value. The fair value of the System's cash invested with the County Treasurer for both pension trust and agency funds totaled \$12,607 and \$11,671 at June 30, 2020 and 2019, respectively. The pool was not rated, and the weighted-average maturity of the pool was 282 days and 321 days at June 30, 2020 and 2019, respectively.

Interest earned but not received from the County Treasurer at year end is reported as a component of accrued investment income on the Statements of Fiduciary Net Position. Cash and investments included within the County Treasurer's pool are described in the County's Comprehensive Annual Financial Report.

Other Cash and Cash Equivalents

At June 30, 2020 and 2019, other cash and cash equivalents constituted balances in bank demand deposit accounts of \$152,905 and \$19,590, respectively.

Short-Term Investments with Fiscal Agents

Short-term investments, which include highly-liquid investments expected to be utilized by the System within 30-90 days, are reported at fair value. These investments may include securities that have a maturity in excess of 90 days but are readily marketable. At June 30, 2020 and 2019, the fair value of the System's short-term investments with fiscal agents was \$254,951 and \$413,299, respectively. These totals consisted of investments in the State Street Short-Term Investment Fund (STIF). The STIF is designed to provide qualified benefit plans with an investment vehicle that may be accessed on a daily basis. The STIF is limited to investing in securities that are rated A-1 by Moody's Investors Services and P-1 by Standard & Poor's Corporation (S&P) at the time of issuance. As of June 30, 2020 and 2019, the STIF is not rated by credit rating agencies. Most investments range in maturity from overnight to 90 days with 20% of the investment over 90 days. For the fiscal years ended June 30, 2020 and 2019, the weighted-average maturities were 35 days and 42 days, respectively. Investments in the STIF from all participating custodial clients of State Street were \$60.6 billion and \$55.2 billion on June 30, 2020 and 2019, respectively.

Fair Value of Investments

The System measures and records its investments using fair value measurement guidelines established by U.S. generally accepted accounting principles (GAAP). These guidelines recognize a three-tiered fair value hierarchy, as follows:

- Level 1 – Fair value is determined using unadjusted quoted prices in active markets for identical assets or liabilities accessible on the measurement date.
- Level 2 – Fair value is determined using quoted prices in inactive markets or significant observable inputs (including, but not limited to, quoted prices for similar investments, interest rates, foreign exchange rates, volatility and credit spreads), either directly or indirectly. These inputs may be derived principally from, or corroborated by, observable market data through correlation or by other means.
- Level 3 – Fair value is determined using unobservable inputs, including situations where there is little market activity, if any, for the asset or liability.

NOTES TO THE BASIC FINANCIAL STATEMENTS (CONTINUED)

NOTES TO THE BASIC FINANCIAL STATEMENTS (CONTINUED)

(Dollar Amounts Expressed in Thousands)

Equity Securities

The majority of the System's domestic and international equity securities are actively traded on major stock exchanges or over-the-counter (OTC). Investments listed or traded on a securities exchange are valued at fair value as of the close of trading on the valuation day. Fair value is determined based on the last reported trade price on the exchange considered to be the primary market for such security. Listed investments that are not traded on a particular day are valued at the last known price which is deemed best to reflect their fair value. Equity securities classified in Level 1 are valued using prices quoted in active markets for those securities.

Fixed Income Securities

Debt securities consist of investments in customized separate accounts and commingled funds which primarily invest in negotiable obligations of the U.S. Government and U.S. Government-sponsored agencies, U.S. and non-U.S. corporations, securitized offerings backed by residential and commercial mortgages, and non-dollar denominated sovereign states. Debt securities that are not actively traded are valued by pricing vendors, which use modeling techniques that include market observable inputs required to develop a fair value, and are classified in Level 2. Typical inputs include recent trades, yields, price quotes, cash flows, maturity, credit ratings, and other assumptions based upon the specifics of the asset type.

Investments Measured at the Net Asset Value (NAV)

Investments valued using the net asset value (NAV) per share (or its equivalent) are investments in non-governmental pooled investment vehicles (i.e., limited partner or non-managing member interest or LP/LLC interest). These alternative investments, unlike more traditional investments, generally do not have readily obtainable fair values and are generally valued at the most recent net asset value per unit or based on capital account information available from the general partners of such vehicles. If the June 30 valuations are not available, the value is derived from the most recent available valuation taking into account of subsequent cash flow activities.

Absolute Return

Absolute return investments are made on a direct basis in limited partnerships, commingled funds, separate accounts, and through externally managed customized separate accounts (CSA). Each CSA manager's investments consist of portfolio funds and co-investments as well as marketable securities held from time to time as a result of a distribution from a portfolio fund.

Absolute return investments include commingled funds that invest in domestic and international investment strategies including: (1) Market neutral strategies such as equity or fixed income market neutral, fixed income arbitrage, and convertible bond arbitrage; (2) Event driven strategies such as risk arbitrage, merger arbitrage, distressed debt, credit and other event-driven strategies; (3) Equity and credit long/short strategies where there is a combination of long and short positions primarily in exchange traded securities, with a net market exposure less than 100% of that of the overall equity or fixed income market (strategies may be focused on U.S., non-U.S., and/or specialty mandates); (4) Global Macro strategies such as all market portfolios, opportunistic long-only, managed futures, currency, dedicated short selling strategies or other specialty strategies; and (5) Multi-strategies where absolute return managers invest using a combination of previously described strategies.

NOTES TO THE BASIC FINANCIAL STATEMENTS (CONTINUED)

(Dollar Amounts Expressed in Thousands)

Absolute return investments are generally less liquid as compared to equity and fixed income and more liquid as compared to private market investments, such as real assets, real estate, private credit, and private equity. Direct absolute return investments consist of securities traded on national security exchanges, as well as securities that do not have readily determinable fair values (illiquid securities). For CSAs, the fund manager's evaluation of the fair value of portfolio funds is based on the most recent available valuation information provided to them by the portfolio funds, adjusted for subsequent distributions from and capital contributions to such portfolio funds, if any.

Typically, the fair value of investments is determined by the fund manager in good faith and in compliance with the following guidelines:

- The value of illiquid investments is determined by the fund manager in good faith and in compliance with the definition of fair value under U.S. GAAP (Financial Accounting Standards Board (FASB). Accounting Standards Codification, Topic 820, *Fair Value Measurements and Disclosures*); however, in some circumstances certain illiquid investments may require reporting financial information and valuations in accordance with accounting standards other than U.S. GAAP, such as under International Financial Reporting Standards.
- Securities that are traded on a national securities exchange are valued at their last reported sales prices on the valuation date on the national securities exchange on which such securities are principally traded or on a consolidated tape which includes such exchange, or, if there are no sales on such date on such exchange or consolidated tape, securities are typically valued at the mean between the last "bid" and "asked" prices at the close of trading on such date on the largest national securities exchange on which such securities are traded.
- Securities not traded on a national securities exchange, but traded over-the-counter, are valued at the last reported sales price as reported by the Nasdaq National Market of the Nasdaq Stock Market, or if such prices are not reported by the Nasdaq Stock Market, as reported by the National Quotation Bureau, Inc., or if such prices are not reported by the National Quotation Bureau, the valuation of options or notional principal contracts not traded on a national securities exchange may be determined in good faith by a reliable source selected by the fund manager.
- Commodity interests traded on a United States or foreign exchange are valued at their last reported settlement price on the valuation date on the exchange on which such interests were purchased or sold. Commodity interests not traded on a United States or foreign exchange are valued at the mean between their last "bid" and "asked" prices on the date as of which the value is being determined, as reported by a reliable source selected in good faith by the fund manager.
- Short-term money market instruments and bank deposits are valued at cost plus accrued interest to the date of valuation.

Equity and Fixed Income Commingled Funds

Certain equity and fixed income investments are invested in a commingled fund to provide dedicated exposure to a specific segment of the market and are valued at NAV. An example would be a core plus fixed income mandate where SCERS receives the high yield credit exposure through a commingled fund that is managed by the investment manager. The most significant input into the NAV of such an entity is the value of its investment holdings. These holdings are valued by the fund manager on a continuous basis and audited annually. The valuation assumptions are based upon both market and property specific inputs which are not observable and involve a certain degree of expert judgment.

NOTES TO THE BASIC FINANCIAL STATEMENTS (CONTINUED)

(Dollar Amounts Expressed in Thousands)

Real Assets and Real Estate

Real assets and real estate investments are held in limited partnerships. Limited partner interest is valued using the NAV of the partnership. Core and core plus real estate is held typically as a limited partner in a commingled fund and is valued at NAV. The most significant input into the NAV of such an entity is the value of its investment holdings. These holdings are valued by the general partners on a recurring basis, audited annually, and periodically appraised by an independent third party. The valuation assumptions are based upon both market and property specific inputs which are not observable and involve a certain degree of expert judgment. Real assets and real estate investments are held in open-ended and closed-ended commingled funds. Closed-ended commingled funds are long-term and illiquid in nature. As a result, investors are subject to redemption restrictions, which generally limit distributions and restrict the ability of limited partners to exit a partnership investment. These investments cannot be redeemed with the funds unless sold in a secondary market. Distributions from each fund will be received as the underlying investments of the funds are liquidated. It is expected that the underlying assets of the funds will be liquidated over 2 to 12 years.

Private Credit and Private Equity

Private credit investments include direct limited partnerships, commingled funds, and separate accounts that invest in direct lending, and opportunistic credit strategies. Private equity investments include limited partnerships, commingled funds and fund of funds (FoF) that invest in domestic and international private buyouts, venture capital, and distressed debt. Private credit and private equity investments are made both on a direct basis in limited partnerships, commingled funds, separate accounts, and through externally managed FoF. Each FoF manager's investments consist of portfolio funds and co-investments as well as marketable securities held from time to time as a result of a distribution from a portfolio fund.

These investments are long-term and illiquid in nature. As a result, limited partners are constrained in their ability to exit a partnership investment prior to its dissolution, other than selling their interest in a private equity secondary market. Distributions are received through cash flows and the liquidation of the underlying assets of the fund. It is expected that the underlying assets of the fund would be liquidated over 8 to 15 years.

Limited partner interest in commingled funds is valued by using the NAV of the partnership. The most significant input into the NAV of such an entity is the value of its investment holdings. These holdings are valued by the general partners on a recurring basis, audited annually, and periodically appraised by an independent third party.

Typically, the fair value of all investments is determined by the fund manager in good faith and in compliance with the definition of fair value under U.S. GAAP (FASB Accounting Standards Codification, Topic 820, *Fair Value Measurements and Disclosures*). In some circumstances, partnership agreements require reporting financial information and valuations in accordance with accounting standards other than U.S. GAAP, such as under International Financial Reporting Standards. The measure of fair value by the fund manager is typically conducted on a quarterly basis. Marketable securities are valued according to the most recent public market price with appropriate discounts to reflect any contractual or regulatory restriction upon sale.

(Dollar Amounts Expressed in Thousands)

The fair value of each investment as reported does not necessarily represent the amount that may ultimately be realized, since such amounts depend upon future circumstances that cannot reasonably be determined until the position is actually liquidated. The evaluation of the fair value of portfolio funds is based on the most recent available valuation information provided by each fund, adjusted for subsequent distributions from and capital contributions to such portfolio funds, if any. The evaluation of the fair value of co-investments is based on the most recent information available at the time of valuation ascribed to such investments by the sponsor partnership. If the manager does not agree with this valuation, holds different securities than the sponsor partnership, is unable to obtain the sponsor partnership's valuation, or has information that results in a different valuation, the manager may use their own internal evaluation of fair value. The assumptions are based upon the nature of the investment and the underlying business. The valuation techniques vary based upon investment type and involve a certain degree of expert judgment.

Investment Derivative Instruments

The fair values of derivative contracts can be affected by changes in interest rates, foreign exchange rates, commodity prices, credit spreads, market volatility, expected return, liquidity and other factors. The majority of the System's derivative instruments are traded in the OTC derivative market and are classified within Level 2. OTC derivatives classified within Level 2 are valued using models that utilize actively quoted or observable market input values from external market data providers, third-party pricing vendors and/or recent trading activity. The fair values of OTC derivatives for swaps and forward contracts are determined using discounted cash flow models. The fair values of option contracts and warrants are determined using Black-Scholes option pricing models. These models' key inputs include the contractual terms of the respective contract along with significant observable inputs, including interest rates, currency rates, credit spreads, equity prices, index dividend yield, volatility, and other factors. The fair value of rights is calculated using the same parameters used for pricing options, including the rights' subscription price, prevailing interest rates, time to expiration, and the share price of the underlying stock, taking into consideration the level of its volatility. Futures positions are exchange traded and settle in cash on a daily basis and thus have no fair value.

Annual Money-Weighted Rate of Return

The money-weighted rate of return expresses investment performance, net of investment expenses, adjusted for the changing amounts actually invested. For the fiscal years ended June 30, 2020 and 2019, the annual money-weighted rate of return on pension plan investments, net of pension plan investment expenses, was 3.1% and 7.2%, respectively.

NOTES TO THE BASIC FINANCIAL STATEMENTS (CONTINUED)

(Dollar Amounts Expressed in Thousands)

SECTION 3: SECURITIES LENDING

State statutes permit the System to participate in securities lending transactions and, pursuant to a Securities Lending Authorization Agreement, the System has authorized State Street Bank and Trust Company (State Street) to act as its agent in lending the System's securities to broker-dealers and banks pursuant to an approved loan agreement.

During the fiscal years ended June 30, 2020 and 2019, on behalf of the System, State Street loaned securities held by State Street as custodian, including U.S. government and agency obligations, domestic corporate bonds, and domestic and international equities and received, as collateral, U.S. and foreign currency, U.S. government bonds, U.S. corporate bonds, U.S. equity, and international equity securities. The System does not have the ability to pledge or sell security collateral absent a borrower defaults. Borrowers are required to deliver collateral for each loan equal to a minimum of 100% of the fair value of the loaned security.

During the fiscal years ended June 30, 2020 and 2019, SCERS did not impose any restrictions on the amount of the loans that State Street made on its behalf. During the fiscal years ended June 30, 2020 and 2019, there were no failures to return loaned securities or pay distributions thereon by any borrowers. Moreover, there were no losses resulting from a default of the borrowers or State Street.

SCERS and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested, together with the cash collateral of other qualified tax-exempt plan lenders, in a collective investment pool. Because the loans were terminable at will, their duration did not generally match the duration of the investments made with cash collateral. Since the collateral received from the borrowers was greater than the amounts borrowed, the System had minimal credit risk exposure to the borrowers. Furthermore, the lending agreement with State Street requires the custodian to indemnify the System if the borrower fails to return the loaned securities.

Additional information regarding the cash collateral investment pool (collateral pool) follows:

Method for Determining Fair Value. The fair value of investments held by the collateral pool is based upon valuations provided by a recognized pricing service.

Policy for Utilizing Amortized Cost Method. Because the collateral pool does not meet the requirements of Rule 2a-7 of the Investment Company Act of 1940, State Street has valued the collateral pool investments at fair value for reporting purposes.

Regulatory Oversight. The collateral pool is not registered with the Securities and Exchange Commission, State Street, and consequently the investment vehicles it sponsors (including the collateral pool), are subject to the oversight of the Federal Reserve Board and the Massachusetts Commissioner of Banks. The fair value of the System's position in the collateral pool is the same as the System's pro rata share of the collateral pool.

NOTES TO THE BASIC FINANCIAL STATEMENTS (CONTINUED)

(Dollar Amounts Expressed in Thousands)

Collateral and related securities on loan at June 30, 2020 and 2019 were as follows:

June 30, 2020				
Security Description	Fair Value of Reinvested Cash Collateral	Cash Collateral Value	Non-Cash Collateral Value	Fair Value of Securities on Loan
Equity	\$68,419	\$67,399	\$13,121	\$80,662
Fixed income	146,764	143,700	116,824	260,489
Total	\$215,183	\$211,099	\$129,945	\$341,151
June 30, 2019				
Security Description	Fair Value of Reinvested Cash Collateral	Cash Collateral Value	Non-Cash Collateral Value	Fair Value of Securities on Loan
Equity	\$84,361	\$83,114	\$23,931	\$ 107,378
Fixed income	188,675	184,807	23,166	207,999
Total	\$273,036	\$267,921	\$47,097	\$315,377

Securities Lending Collateral Credit Risk

All of the cash collateral received for securities lending is invested in the State Street Quality D STIF – Liquidity Pool (Quality D Fund), which is not rated by credit rating agencies. At the time of purchase, all securities with maturities of 13 months or less must be rated at least A1, P1 or F1 and all securities with maturities in excess of 13 months must be rated A- or A3 by any two of the nationally-recognized statistical rating organizations or, if unrated, be of comparable quality. The fund may invest in other State Street managed vehicles provided they conform to the guidelines.

Securities Lending Collateral Interest Rate Risk

The Quality D Fund's Investment Policy Guidelines provide that the lending agent shall maintain the dollar-weighted average maturity of the Quality D Fund in a manner that the lending agent believes is appropriate to the objective of the Quality D Fund, provided that (i) in no event shall any Eligible Security be acquired with a remaining legal final maturity of greater than 18 months, (ii) the lending agent shall maintain a dollar-weighted average maturity of the Quality D Fund not to exceed 75 calendar days and (iii) the lending agent shall maintain a dollar-weighted average maturity to final of the Quality D Fund not to exceed 180 calendar days. As of June 30, 2020 and 2019, the weighted average maturity was 27 days and 23 days, respectively.

(Dollar Amounts Expressed in Thousands)

SECTION 4: DEPOSIT AND INVESTMENT RISKS

Pursuant to GASB Statement No. 40, *Deposit and Investment Risk Disclosure*, the following schedules disclose the System's investments subject to certain types of risk.

Credit Risk

Credit risk is the risk that an issuer or other counterparty to a debt instrument will not fulfill its obligations. This is measured by the assignment of ratings by nationally-recognized statistical rating organizations. The ratings used to determine the quality of the individual securities are the ratings provided by Standard & Poor's (S&P). If there are no ratings provided by S&P, then the ratings provided by Moody's and Fitch Group are used, respectively.

SCERS utilizes external investment managers to manage its portfolios. SCERS' Investment Policy specifies that fixed income investments will include both active and passive index investments in U.S. Treasury and agency securities, corporate bonds, mortgage-backed and asset-backed securities and non-dollar denominated sovereign and corporate debt.

SCERS' portfolio has two actively-managed investment strategies, referenced as strategy 1 and strategy 2. Strategy 2 will have a minimum average credit quality rating of Baa1/BBB+ by a Nationally Recognized Statistical Rating Organization (NRSRO). Portfolio diversification is constrained by the following parameters in order to minimize overall market and credit risk:

- For strategy 2, securities rated below B-/B3 by an NRSRO are limited to 10% of the portfolio at the time of purchase, while securities rated below CCC- or Caa3 at the time of purchase, by an NRSRO are prohibited.
- No more than 10% and 5% of the portfolio will be concentrated in any one issuer except U.S. Government and agency securities for strategies 1 and 2, respectively.
- No more than 20% and 25% of the portfolio will be invested in high yield or below investment grade straight securities for strategies 1 and 2, respectively.
- No more than 15% and 10% of the portfolio will be invested in convertible securities, which include bonds and preferred issues, for strategies 1 and 2, respectively.
- No more than 20% of the portfolio will be invested in non-U.S. dollar bonds for each strategy.
- No more than 15% of the portfolio will be invested in Emerging Markets at the time of purchase for strategy 2.
- Net exposure to interest rate derivatives will be limited to 25% of the duration of the portfolio for strategy 2.
- Net exposure to credit derivatives (CDS, CDX) will be limited to 25% of the fair value of the portfolio for strategy 2.
- Gross notional exposure to credit derivatives (CDS, CDX) will be limited to 50% of the fair value of the portfolio for strategy 2.

NA represents securities explicitly guaranteed by the U.S. government, which are not subject to the GASB Statement No. 40 credit risk disclosure requirements. NR represents those securities that are not rated.

Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer. As of June 30, 2020 and 2019, the System had no single issuer that exceeds 5% of total investments per GASB Statement No. 40 disclosure requirements or any one issuer which represents 5% or more of total fiduciary net position in accordance with GASB Statement No. 67. Investments issued or explicitly guaranteed by the U.S. government and investments in mutual funds, external investment pools, and other pooled investments are exempt from the disclosure requirements.

The System's investment policy does not allow more than 5% of the total portfolio fair value to be invested in any one issuer, and as of June 30, 2020 and 2019, the System had no issuer that exceeds 5% of total portfolio fair value. As noted in the previous discussion of credit risk, manager investment guidelines place limitations on the maximum holdings in any one issuer.

Custodial Credit Risk

Custodial credit risk is the risk that, in the event a financial institution or counterparty fails, the System would not be able to recover the value of its deposits, investments, or securities. As of June 30, 2020 and 2019, the bank balance of cash and cash equivalents on deposit with SCERS' custodian bank and financial institutions totaled \$123,130 and \$11,250, respectively, of which \$122,146 and \$9,193 were not insured by the Federal Deposit Insurance Corporation (FDIC) and were exposed to custodial credit risk. The System believes that the risk is not significant because the cash is held with major financial institutions.

As of June 30, 2020 and 2019, deposits held in the System's name for the margin accounts of \$30,288 and \$8,828, respectively, were not insured or not collateralized, and these deposits were exposed to custodial credit risk.

As of June 30, 2020 and 2019, 100% of the System's investments held with the custodian were held in the System's name, and the System is not exposed to custodial credit risk related to these investments. There are no general policies relating to custodial credit risk.

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The investment guidelines negotiated with the actively-managed external portfolio managers give the managers the discretion to deviate within +/-20% and +/-30%, for strategies 1 and 2, respectively, from the effective duration of the relevant Barclays Capital Aggregate benchmark based on the portfolio total.

The following tables depict the duration in years of the long-term fixed income portfolio vs. the benchmark.

June 30, 2020

Type of Securities	Fair Value	Effective Duration	Benchmark Duration	Difference
Securitized Obligations				
Asset-Backed Securities	\$531,106	4.06	2.19	1.87

(Dollar Amounts Expressed in Thousands)

Highly Sensitive Investments

As of June 30, 2020 and 2019, SCERS' investments included Collateralized Mortgage Obligations and Mortgage Pass-Through securities totaling \$347,929 and \$304,104, respectively. These securities are highly sensitive to interest rate fluctuations in that they are subject to early payment in a period of declining interest rates. The resulting reduction in expected total cash flows affects the fair value of these securities.

As of June 30, 2020 and 2019, total commodities investments were \$5,499 and \$44,777, respectively. The investments consist of commodity futures hedge fund-of-funds and exposure through a customized, diversified real assets strategy. During the fiscal year ended 2020, SCERS eliminated a dedicated 2% target allocation to commodities, which was implemented through a commodity futures strategic fund, and replaced it with a 2% Liquid Real Return allocation.

Spot commodity prices have historically been a poor investment and have declined in real terms. However, investment in collateralized commodity futures can provide higher returns. The futures market is an efficient way for producers to hedge price risk by forward-selling commodities at lower prices relative to spot prices to investors and speculators generating a roll yield (backwardation).

In general, commodities are volatile investments that are prone to large price spikes. By investing in commodity futures, investors get exposure to short-term price movement and risk, as well as long-term price trends. This price volatility and the need for producers to hedge their production provides the fundamental rationale for why investment managers pay the risk premium to speculators and long-only investors in the commodity markets.

SECTION 5: DERIVATIVE INSTRUMENTS

The System's investment portfolios contain individual securities as well as investments in external investment pools. The System's investment policy allows investment managers to use derivative instruments for certain purposes and within certain parameters. Such instruments include futures contracts, currency forward contracts, option contracts, swap agreements, and rights and warrants. The System use derivatives to minimize the exposure of certain investments to adverse fluctuations in financial and currency markets, as an alternative to investments in the cash market in which the manager is permitted to invest, and as an additional yield curve and/or duration management strategy. The System does not use derivatives for speculative purposes or to create leverage, however, this does not apply to investments in external pools. As of June 30, 2020 and 2019, the derivative instruments held by the System are considered investments and not hedges for accounting purposes. The gains and losses arising from this activity are recognized as incurred in the Statements of Changes in Fiduciary Net Position.

NOTES TO THE BASIC FINANCIAL STATEMENTS (CONTINUED)

(Dollar Amounts Expressed in Thousands)

The tables below present the related net appreciation/(depreciation) in fair value, the fair value and the notional value of derivative instruments outstanding at June 30, 2020 and 2019:

June 30, 2020

Total Derivatives Instruments	<u>\$34,092</u>		<u>\$(5,060)</u>	

* Present in number of shares.

Futures contracts are financial instruments that derive their value from underlying indices or reference rates and are marked-to-market at the end of each trading day. Daily settlement of gains and losses occur on the following business day. As a result, the instruments themselves have no fair value at June 30, 2020 and 2019, or at the end of any trading day. Daily settlement of gains and losses is a risk control measure to limit counterparty credit risk. Futures variation margin amounts are settled each trading day and recognized in the financial statements under net appreciation/(depreciation) in fair value of investments as they are incurred.

Forward contracts are obligations to buy or sell a currency or other commodity at a specified exchange rate and quantity on a specific future date. The fair value of the foreign currency forwards is the unrealized gain or loss calculated based on the difference between the specified exchange rate and the closing exchange rate at June 30, 2020 and 2019.

NOTES TO THE BASIC FINANCIAL STATEMENTS (CONTINUED)

(Dollar Amounts Expressed in Thousands)

Counterparty Credit Risk

The tables below present the counterparty credit ratings of the System's non-exchange traded investment derivative instruments outstanding and subject to loss at June 30, 2020 and 2019:

June 30, 2020			
S&P Rating	Forwards	Swaps	Total
A	\$1,759	\$-	\$1,759
A+	2,690	680	3,370
AA-	171	-	171
BBB+	110	1,683	1,793
Investments in Asset Position	4,730	2,363	7,093
Investments in Liability Position	(2,175)	(256)	(2,431)
Total Investments in Asset/(Liability) Position	\$2,555	\$2,107	\$4,662

June 30, 2019			
S&P Rating	Forwards	Swaps	Total
A	\$55	\$1	\$56
A+	1,992	7	1,999
AA-	174	-	174
BBB+	128	255	383
Investments in Asset Position	2,349	263	2,612
Investments in Liability Position	(1,232)	(4,699)	(5,931)
Total Investments in Asset/(Liability) Position	\$1,117	\$(4,436)	\$(3,319)

The System could be exposed to risk if the counterparties to derivative contracts are unable to meet the terms of the contracts. The System's investment managers seek to control this risk through counterparty credit evaluations and approvals, counterparty credit limits, and exposure monitoring procedures. The System anticipates that the counterparties will be able to satisfy their obligations under the contracts.

The aggregate fair value of investment derivative instruments in an asset position subject to counterparty risk at June 30, 2020 and 2019 was \$7,093 and \$2,612, respectively. This represents the maximum loss that would be recognized at the reporting date if all counterparties failed to perform as contracted. The System did not have any master netting agreements with its counterparties at June 30, 2020 and 2019, except that certain investment managers used netting arrangements at their discretion to minimize counterparty risks. The above schedules present exposure for similar instruments with the same counterparty on a net basis.

At June 30, 2020 and 2019, the System did not have any significant exposure to counterparty credit risk with any single party.

The System has investments in futures contracts. As indicated on the preceding pages, futures variation margin accounts are settled each trading day and recognized as realized gains/(losses) as they are incurred. As a result, the foreign futures contracts have no fair value at June 30, 2020 and 2019.

NOTES TO THE BASIC FINANCIAL STATEMENTS (CONTINUED)

(Dollar Amounts Expressed in Thousands)

NOTE 4 - PENSION LIABILITY AND SIGNIFICANT ASSUMPTIONS

The employers' net pension liabilities (i.e., the total pension liability determined in accordance with GASB Statement No. 67 less the System's fiduciary net position) as of June 30, 2020 and 2019 are shown below:

	2020	2019
Total Pension Liability	\$12,693,655	\$11,895,520
Less: Fiduciary Net Position	9,979,379	9,821,694
Net Pension Liability	\$2,714,276	\$2,073,826
Fiduciary Net Position as a Percentage of Total Pension Liability	78.6%	82.6%

The actuarial valuation of the System involves estimates of the amounts reported and assumptions about the probability of occurrence of events far into the future. Some examples include future salary increases and future employee mortality. The net pension liability is subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. Triennially, the System requests that its actuary, Segal, perform an analysis of the appropriateness of all economic and non-economic assumptions. The last triennial analysis was performed as of June 30, 2019 and 2016, and as a result of that analysis, the Board of Retirement approved certain changes to the actuarial assumptions, which were incorporated in the actuarial valuation reports as of June 30, 2020 and 2019.

Disclosure of Information about Actuarial Methods and Assumptions

The required Schedule of Changes in Net Pension Liability and Related Ratios, immediately following the Notes to the Basic Financial Statements, presents multi-year trend information about whether the employers' net pension liability is increasing or decreasing over time.

The projection of benefits for financial reporting purposes does not explicitly incorporate the potential effects of legal or contractual funding limitations.

Actuarial Methods and Assumptions:

The following significant actuarial assumptions were used to measure the total pension liabilities as of June 30, 2020 and 2019:

	June 30, 2020	June 30, 2019
Discount rate:	6.75%	7.00%
Inflation rate:	2.75%	3.00%
Real across-the-board salary increase:	0.25%	0.25%
Projected salary increases*:	4.25% - 10.50%	4.50% to 10.75%

* Varying by service plus merit and longevity increases, and includes inflation at 2.75% and 3.00% plus real across-the-board salary increase of 0.25% as of June 30, 2020 and 2019, respectively.

NOTES TO THE BASIC FINANCIAL STATEMENTS (CONTINUED)

(Dollar Amounts Expressed in Thousands)

Assumed Asset Allocation

The long-term expected rate of return on pension plan investments was determined using a building-block method in which expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation and subtracting expected investment expenses and a risk margin. The target allocation and projected arithmetic real rates of return for each major asset class, after deducting inflation, but before deducting investment expenses, used in the derivation of the long-term expected investment rate of return assumption, as of June 30, 2020 and 2019 are summarized in the table below:

Asset Class	June 30, 2020		June 30, 2019	
	Target Allocation	Long-Term Expected Arithmetic Real Rate of Return	Target Allocation	Long-Term Expected Arithmetic Real Rate of Return
U.S. Large Cap Equity	18.0%	5.4%	17.0%	5.6%
U.S. Small Cap Equity	2.0	6.2	4.0	6.4
International Developed Equity	16.0	6.5	16.0	7.0
Emerging Markets Equity	4.0	8.8	4.0	9.3
Core/Core Plus Bonds	10.0	1.1	10.0	1.1
High Yield Bonds	1.0	3.4	1.0	3.7
Global Bonds	3.0	-	3.0	0.1
Bank Loans	1.0	3.9	1.0	3.0

Cash	1.0	-	-	-
	100.0%		100.0%	

NOTES TO THE BASIC FINANCIAL STATEMENTS (CONTINUED)

(Dollar Amounts Expressed in Thousands)

Sensitivity of the Net Pension Liability to Changes in the Discount Rate

The discount rates used to measure the total pension liability were 6.75% and 7.00% as of June 30, 2020 and 2019, respectively. The projection of cash flows used to determine the discount rate assumed that member contributions will be based on the current contribution rate and that employer contributions will be made at the end of each pay period based on the actuarially determined contribution rates. For this purpose, only the employer contributions that are intended to fund benefits for current Plan members and their beneficiaries are included.

Projected employer contributions that are intended to fund the service cost for future Plan members and their beneficiaries, as well as projected contributions from future Plan members, are not included.

Based on those assumptions, the System's fiduciary net position was projected to be available to make all the projected future benefit payments for current Plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability as of June 30, 2020 and 2019.

In accordance with GASB Statement No. 67 regarding the disclosure of the sensitivity of the net pension liability to changes in the discount rate, the table below presents the employers' net pension liabilities as of June 30, 2020 and 2019, calculated using the discount rate, as well as what the employers' net pension liability would be if it were calculated using a discount rate that is 1.00% lower or 1.00% higher than the current rate.

	1% Decrease 5.75%	Current Discount Rate 6.75%	1% Increase 7.75%
Net pension liability as of June 30, 2020	\$4,448,538	\$2,714,276	\$1,294,578
	1% Decrease 6.0%	Current Discount Rate 7.0%	1% Increase 8.0%
Net pension liability as of June 30, 2019	\$3,713,495	\$2,073,826	\$734,226

NOTE 5 - CONTRIBUTIONS REQUIRED AND CONTRIBUTIONS MADE

Contributions to the Plan are made pursuant to Section 31584 of the 1937 Act. The System's funding policy provides for periodic contributions at actuarially-determined rates that, expressed as percentages of annual covered payroll, are sufficient to accumulate adequate assets to pay benefits when due. Members of the System are required to contribute, and such contributions range from 3.87% to 25.86% of annual covered salary for fiscal year 2019-20 and from 3.87% to 25.14% of annual covered salary for fiscal year 2018-19 depending on the member's tier, employer, and bargaining unit. Each employer of the System is obligated by State law to make all required contributions to the Plan and, depending on the participating employer and their employees' tiers, such contribution rates range from 9.81% to 54.68% of covered payroll for fiscal year 2019-20 and from 9.37% to 48.41% of covered payroll for fiscal year 2018-19. The required contributions include current service cost and amortization of any unfunded prior service cost as of June 30, 2012 over a period of 23 years from June 30, 2012, amortization of any unfunded service costs resulting in actuarial gains or losses and amortization of any unfunded service costs resulting from changes in actuarial assumptions and methods over a 20-year period, amortization of any unfunded service costs resulting from Plan amendments over a 15

NOTES TO THE BASIC FINANCIAL STATEMENTS (CONTINUED)

(Dollar Amounts Expressed in Thousands)

year period and amortization of any unfunded service costs resulting from retirement incentive programs over a period of up to 5 years.

Employer contribution rates are determined using the entry age normal cost method based on a level percentage of payroll. The System also uses this actuarial method to amortize the unfunded liability, if applicable. Member and employer contributions for the fiscal years ended June 30, 2020 and 2019 totaled \$402,584 and \$407,485 respectively. Included in this total are employer contributions of \$276,230 and \$285,642 in fiscal years 2019-20 and 2018-19, respectively, of which \$251,466 and \$220,141 were made by the County of Sacramento. Member contributions were \$126,354 and \$121,843 in fiscal years 2019-20 and 2018-19, respectively. All contributions were made in accordance with actuarially-determined contribution requirements based on the actuarial valuations performed as of June 30, 2018 and 2017, respectively.

NOTE 6 - RESERVES

Member and employer contributions are allocated to various legally required reserve accounts based on actuarial determinations. Descriptions of the purpose for the reserve and designated accounts are provided below.

Member reserve represents the balance of member contributions. Additions include member contributions and interest earnings. Deductions include refunds of member contributions and transfers to retiree reserves.

Employer reserve represents the balance of employer contributions for future retirement payments to current active members. Additions include contributions from the employer and interest earnings. Deductions include transfers to retiree reserves, lump sum death benefits, and payments under California Government Code Sections 31725.5 and 31725.6 related to alternative employment for members otherwise entitled to disability retirement benefits.

Retiree and death benefit reserves represent the balance of transfers from member reserves, employer reserves, and interest earnings, less payments to retirees, and payments to beneficiaries of retired members who are deceased.

Contingency reserve was created to serve as a reserve against deficiencies in future earnings and unexpected expenses.

Investment gains and losses are recognized (smoothed) over a seven-year period. **Total allocated reserves and designations** represent the smoothed actuarial value of assets (the fair value of assets less the unrecognized/deferred gains and losses) and is the sum of the preceding reserves.

Market stabilization reserve represents the unrecognized/deferred gains and losses and is the difference between the smoothed actuarial value of assets and the net position restricted for pension benefits at fair value.

NOTES TO THE BASIC FINANCIAL STATEMENTS (CONTINUED)

(Dollar Amounts Expressed in Thousands)

A summary of the various reserve accounts, which comprise net position restricted for pension benefits at June 30, 2020 and 2019, is as follows:

	2020	2019
Member reserve	\$984,497	\$906,927
Employer reserve	3,093,045	2,908,795
Retiree and death benefit reserves	6,008,235	5,757,776
Contingency reserve	143,983	129,815
Total allocated reserves and designations	10,229,760	9,703,313
Market stabilization reserve	(250,381)	118,381
Net position restricted for pension benefits	\$9,979,379	\$9,821,694

NOTE 7 - PLAN TERMINATION

SCERS is administered in accordance with the provisions of the 1937 Act found in the California Government Code at Section 31450 et seq. Once adopted by the governing body of a county, there are no provisions in the 1937 Act which permit the governing body of the county to terminate the Plan. Section 31564 permits the governing body of a district to withdraw its employees if certain prerequisites are met. The governing body of a county or district can adopt optional provisions within the 1937 Act via ordinance or resolution. Once adopted, Section 31483 permits the governing body of a county or district to terminate the applicability of the optional provisions after a future date as specified in a subsequent ordinance or resolution.

NOTE 8 - RETIREE MEDICAL AND DENTAL INSURANCE PROGRAM

Plan Description

The Sacramento County Retiree Medical and Dental Insurance Program (the Program) is a multiple-employer medical and dental plan, which is sponsored and administered by the County of Sacramento and financed by three participating employers. SCERS' role in regard to the Program is limited to maintaining data provided by the administrator, collecting monies from the participating employers and retirees, and remitting premium payments to health carriers. The activities of the Program are accounted for in the agency fund. SCERS does not provide any funding for the Program.

Below is the list of employers participating in the Program as of June 30, 2020 and 2019:

- County of Sacramento
- Sacramento Metropolitan Fire District
- Sacramento Employment and Training Agency

The Program provides medical and/or dental subsidy/offset payments to eligible retirees. The Sacramento County Board of Supervisors, at its own discretion, sets the amount of subsidy/offset payment available to eligible County retirees on a year-to-year basis. The medical subsidy amounts for special districts' retirees are varied and are established by each of the special district. As of June 30, 2020, there were 314 annuitants receiving medical subsidy and 378 annuitants receiving dental subsidy. As of June 30, 2019, there were 310 annuitants receiving medical subsidy and 333 annuitants receiving dental subsidy.

NOTES TO THE BASIC FINANCIAL STATEMENTS (CONTINUED)

(Dollar Amounts Expressed in Thousands)

Eligibility

(Amounts Expressed in Dollars)

County annuitants who retired after May 31, 2007 - According to the Program's Administrative Policy, only County annuitants from bargaining unit 003, who retired after May 31, 2007, may be eligible for a premium subsidy/offset depending on the annuitant's credited service hours and type of retirement. For fiscal years ended June 30, 2020 and 2019, the monthly dental subsidy was \$25, and the monthly medical subsidy amounts range from \$122 to \$244 depending on the annuitant's retirement date and years of service.

Special Districts' annuitants - The medical subsidy amounts for special districts' annuitants are varied and are established by each of the member districts. For the fiscal years ended June 30, 2020 and 2019, the monthly medical subsidy amounts range from \$72 to \$397, depending on the annuitant's retirement date and years of service.

There are no vested benefits associated with the Program. The Program does not create any contractual, regulatory, or other vested entitlement to present or future retirees, their spouses, or dependents for medical and/or dental benefits, or subsidy/offset payments at any particular level, or at all. The County of Sacramento and other participating employers may, in their sole discretion, amend or terminate, in whole or in part, the Program by Resolution of the Board of Supervisors.

Contributions and Reserves

The System does not have any authority to establish or amend the obligations of the Plan members and employers to contribute to the Program. SCERS does not determine the contribution rate or collect the required contributions from employers. Monies received by the System in excess of liabilities to pay premiums are recognized as liabilities payable to the employers. There are no net position or legally required reserve accounts for the Program.

Request for Information

Requests for additional financial information regarding the Program may be addressed to:

County of Sacramento
Department of Finance, Auditor-Controller Division
700 H Street, Room 3650
Sacramento, CA 95814

NOTE 9 - CONTINGENCIES

The System is involved in litigation relating to various matters. In the opinion of management, after consultation with legal counsel, the outcome of these matters is not expected to have a material adverse effect on the System's financial statements.

NOTE 10 - FUTURE ACCOUNTING PRONOUNCEMENTS

In January 2017, GASB issued Statement No. 84, *Fiduciary Activities*, which establishes criteria for identifying and reporting fiduciary activities of all state and local governments. The requirements of this statement were originally effective for financial statements for periods beginning after December 15, 2018. However, in light of the COVID-19 pandemic, GASB postponed implementation of this statement by one year of its effective date. Management is evaluating the requirements of this GASB Statement and its impact to SCERS' financial statements, which will be effective in fiscal year ending June 30, 2021.

In June 2017, GASB issued Statement No. 87, *Leases*, which establishes a single model for lease accounting based on the foundational principle that leases are financings of the right to use an underlying asset. This statement improves accounting and financial reporting for leases by governments by requiring recognition of certain lease assets and liabilities for leases that previously were classified as operating leases and recognized as inflows of resources or outflows of resources based on the payment provisions of the contract. The requirements of this statement were originally effective for the System's financial statements for the fiscal year ending June 30, 2021. However, in light of the COVID-19 pandemic, GASB postponed implementation of this statement by one year of its effective date. Management is evaluating the requirements of this GASB Statement and its impact to SCERS' financial statements, which will be effective in fiscal year ending June 30, 2022.

NOTE 11 - SUBSEQUENT EVENTS

The COVID-19 pandemic outbreak in the United States has caused business disruption through mandated closings of businesses. While the disruption is expected to be temporary, the durations of the closings and the related financial impacts on SCERS remain uncertain and cannot be estimated at this time.

SCHEDULE OF EMPLOYER CONTRIBUTIONS

FOR THE LAST TEN FISCAL YEARS ENDED JUNE 30

	2020	2019	2018	2017	2016
Actuarially determined contribution (ADC)	\$274,055	\$240,238	\$198,331	\$201,928	\$207,884
Contributions in relation to the ADC	274,055	240,238	198,331	201,928	207,884
Contribution deficiency (excess)	\$-	\$-	\$-	\$-	\$-
Covered payroll*	\$1,059,984	\$1,017,885	\$985,375	\$958,934	\$912,421
Contributions in relation to the ADC as a percentage of covered payroll	25.9%	23.6%	20.1%	21.1%	22.8%
	2015	2014	2013	2012	2011
Actuarially determined contribution (ADC)	\$221,823	\$209,367	\$188,529	\$179,099	\$182,921
Contributions in relation to the ADC	221,823	209,367	188,529	179,099	182,921
Contribution deficiency (excess)	\$-	\$-	\$-	\$-	\$-
Covered payroll*	\$873,328	\$858,343	\$858,551	\$835,737	\$818,804
Contributions in relation to the ADC as a percentage of covered payroll	25.4%	24.4%	22.0%	21.4%	22.3%

* Covered payroll for the years ending 2011 and 2012 are calculated by dividing the contribution dollar amount by the aggregated contribution rate.

SCHEDULE OF ANNUAL MONEY-WEIGHTED RATE OF RETURN

FOR THE FISCAL YEARS ENDED JUNE 30

	2020	2019	2018	2017	2016	2015	2014
Annual money-weighted rate of return, net of investment expenses*	3.1%	7.2%	9.8%	13.6%	(1.0)%	2.0%	16.2%

* Information prior to June 30, 2014 is not available. Information will be presented for future years as it becomes available.

NOTES TO THE REQUIRED SUPPLEMENTARY INFORMATION

(Dollar Amounts Expressed in Thousands)

The schedules presented in the Required Supplementary Information provide information to help promote an understanding of the employers' net pension liability over time on a fair value of assets basis. The Schedule of Changes in Net Pension Liability and Related Ratios includes historical trend information about the System's total pension liability and the progress made in accumulating sufficient assets to pay benefits when due.

The Schedule of Employer Contributions presents historical trend information about the actuarially determined contribution and the actual contributions made. The Schedule of Annual Money-Weighted Rate of Return presents investment performance, net of pension plan investment expense, adjusted for the changing amounts actually invested.

METHODS AND ASSUMPTIONS USED TO ESTABLISH ACTUARIALLY DETERMINED CONTRIBUTION RATES

The following actuarial methods and assumptions were used to determine the fiscal year 2019-20 contribution rates reported in the Schedule of Employer Contributions:

Valuation date:	Actuarial valuation report as of June 30, 2018
Actuarial cost method:	Entry Age Actuarial Cost Method
Amortization method:	Level percent of payroll (3.25% payroll growth assumed)
Remaining amortization period:	17 years (declining) as of June 30, 2018 for the outstanding balance of the June 30, 2012 UAAL. The UAAL established as a result of the Early Retirement Incentive Program for Law Enforcement Managers Association (LEMA) members is amortized over a 10-year period, beginning June 30, 2010. Effective June 30, 2013, any changes in UAAL due to actuarial gains or losses or due to changes in actuarial assumptions or methods will be amortized over a 20-year closed period effective with each valuation. Any change in UAAL that arises due to Plan amendments will be amortized over its own declining 15-year period and any change in UAAL due to retirement incentive programs will be amortized over a declining period of up to 5 years.
Asset valuation method:	The fair value of assets less unrecognized returns in each of the last six years. Unrecognized return is equal to the difference between actual and expected returns on a fair value basis and is recognized over a rolling seven-year period. The deferred return is further adjusted, if necessary, so that the actuarial value of assets will stay within 30% of the fair value of assets. Deferred gains and losses as of June 30, 2013 have been combined and will be recognized in equal amounts over a six-year period starting July 1, 2013.

NOTES TO THE REQUIRED SUPPLEMENTARY INFORMATION (CONTINUED)

(Dollar Amounts Expressed in Thousands)

Actuarial assumptions:

Investment rate of return: 7.00%, net of pension plan investment expense, including inflation

Inflation rate: 3.00%

Projected salary increases: 4.5% - 10.75% varying by service, including inflation

Assumed post-retirement benefit increase:	Miscellaneous Tier 1	3.00%
	Miscellaneous Tier 2	0.00%
	Miscellaneous Tier 3	2.00%
	Miscellaneous Tier 4	2.00%
	Miscellaneous Tier 5	2.00%
	Safety Tier 1	3.00%
	Safety Tier 2	2.00%
	Safety Tier 3	2.00%
	Safety Tier 4	2.00%

Other assumptions: Same as those used in June 30, 2018 funding actuarial valuation.

Other information: All members with membership dates on or after January 1, 2013 enter the new tiers created by the California Public Employees' Pension Reform Act of 2013 (PEPRA).

NOTES TO THE REQUIRED SUPPLEMENTARY INFORMATION (CONTINUED)

(Dollar Amounts Expressed in Thousands)

Changes in Methods and Assumptions Used to Determine the ADC

Valuation date as of June 30:

- 2011
 - Modification in non-economic assumptions.
 - Investment return assumption decreased from 7.75% to 7.50%.
- 2012
 - Inflation assumption decreased from 3.50% to 3.25%.
 - Salary increase assumption decreased from 5.65% to 5.40%.
 - Cost-of-living adjustment increase assumption for Tier 1 decreased from 3.40% to 3.25%.
- 2013
 - Actuarial cost method changed from Aggregate Entry Age Normal Cost Method to Individual Entry Age Normal Cost Method.
 - Changes to the amortization periods used for various future changes in liability.
 - UAAL established as a result of Early Retirement Incentive Program for Sacramento County Law Enforcement Managers Association (LEMA) is amortized over a 10-year period beginning June 30, 2010.
 - UAAL as a result of actuarial gains or losses as of June 30 will be amortized over a 20-year period.
 - UAAL as a result of changes in actuarial assumptions or methods to be amortized over a 20-year period.
 - Change in UAAL as a result of Plan amendments to be amortized over a 15-year period.
 - UAAL as a result from retirement incentive programs will be amortized over a period up to 5 years.
 - The retirement rates were adjusted to reflect slightly later retirements.
- 2014
 - The mortality rates were adjusted to reflect a slight mortality improvement.
 - Termination rates were adjusted to reflect lower incidence of termination, with a higher proportion electing to receive a deferred vested benefit.
 - Years of service instead of age was used in determining and applying the merit and promotional rates of salary increase.
- 2017
 - The inflation rate was reduced from 3.25% to 3.0% to reflect the gradual decline of average inflation rates over the last several years.
 - The investment rate of return was reduced from 7.50% to 7.00% to reflect the projected real rate of return for the next 10-15 years based on SCERS' asset allocation model and risk tolerance.
 - The salary increase assumption was adjusted slightly to reflect past experience.
 - The retirement rates were adjusted to be more in line with the experience.
 - The mortality rates were adjusted and a generational approach was used to reflect a slight mortality improvement.
 - Termination rates were adjusted to reflect lower incidence of termination, with a lower proportion electing to receive a deferred vested benefit.
 - The disability rates were adjusted to reflect slightly lower incidence of disability for Miscellaneous and Safety members.
 - An assumption was introduced for new Miscellaneous disabled retirees to anticipate conversions of unused sick leave at retirement.

SECTION 3

Investment

CHIEF INVESTMENT OFFICER'S REPORT

Introduction

For the fiscal year ended June 30, 2020, the Sacramento County Employees' Retirement System (SCERS) generated a 2.9% gross return. While the returns came in short of SCERS' 7% actuarial rate of return, the results were surprising given that SCERS' fiscal year returns were down over 4% at the end of March 2020 when COVID-19 related market volatility peaked. The portfolio's strongest returns came from the U.S. Fixed Income, Domestic Equity, and Private Equity asset classes. The fiscal year return exceeded SCERS' policy index return of 1.5%, by 1.4%. Assets under management ended the current fiscal year at \$9.8 billion, in-line with the prior fiscal year's level of assets.

SCERS' general investment consultant, Verus Advisory (Verus), prepared the investment returns cited in this transmittal using information it receives from SCERS' custodian bank and investment managers.

Market Overview

The first half of the fiscal year (second half of calendar year 2019) saw the continuation of the longest economic expansion in modern history, at over 10 years. Global equity markets returned greater than 20% in calendar year 2019, unemployment was at 50-year lows, interest rates were low fueled by accommodative monetary policy, and economic growth was coming in just shy of long-term trends. Heading into calendar year 2020, risks appeared to be fairly balanced, and it was reasonable to expect that the 2019 market rally could continue into 2020. However, there were plenty of downside risks that could trigger a slowdown, including negative economic data surprises, trade negotiations, geopolitical risk, political uncertainty, including this year's presidential election in the U.S., and early threats of a new coronavirus coming out of China, COVID-19.

By February of 2020, COVID-19 was quickly becoming recognized as a global threat, and by mid-March COVID-19 was identified as a global pandemic by the World Health Organization, with most of the world entering into mandatory stay-at-home orders. The health impact from COVID-19 has been devastating, with tragic outcomes for families globally. COVID-19 has also had a tremendous economic impact, with many segments of the economy coming to a grinding halt in line with the stay at-home-orders. In March of 2020, liquidity within the financial markets dried up, creating unprecedented mark-to-market losses across assets. The unprecedented impact within the economy and the financial markets led to governments acting quickly and aggressively, both through fiscal and monetary policy. The U.S. congress introduced the \$2.3 trillion U.S. Cares Act economic stimulus package, and the Federal Reserve flooded the financial markets with over \$3 trillion in liquidity.

The economic impact of COVID-19 has been severe. With the sudden stay-at-home orders, second quarter 2020 gross domestic product (GDP) was significantly impacted, growing at a negative 31.9% quarterly annualized rate, and the economy entered into a recession ending the longest period of economic expansion in modern history. The contraction has been felt across all segments of the economy, from the consumer, state and local government expenditures, and business investment. However, the impact on consumer spending has been the most significant. While most market experts are expecting a meaningful recovery in the third and fourth quarter of 2020, the aggregate GDP growth rate for calendar year 2020 is expected to be negative. There has also been an inconsistent recovery between financial markets and the economy. Financial markets have experienced more of a "V-shaped" recovery off of accommodative monetary policy and optimism around a vaccine for COVID-19, while a recovery for the broad economy is expected to take longer. The U.S. labor market was decimated during the second quarter of 2020, with the unemployment rate jumping from historic lows of 3.5% early in 2020 to 14.7% in April. As the economy has partially reopened and many of the temporarily unemployed have gone back to work, the unemployment rate has fallen, and stood at 7.9% at the end of September 2020. However, it still has a long way to go to recover the jobs that

were lost, and there is concern that many of the remaining temporary job losses could become permanent. Core inflation (which excludes food and energy) has stayed low at 1.7% (as of September 2020), but falling energy prices have kept headline inflation even lower at 1.4%, below the Fed's baseline level of 2.0%.

The pandemic has created stark divergences within the economy, with many industries having been decimated, while others have benefitted and thrived. When stay-at-home orders were in place in March and April 2020, travel, hotels, and seated-dining business came to a grinding halt. During this time, year-over-year economic activity within seated dining was off by 100%, TSA traveler traffic off by 96%, and hotel occupancy off by 69%. As of September 30, 2020, these industries have recovered modestly as the economy has slowly re-opened, but are still off on a year-over-year basis by 43%, 70%, and 32%, respectively. Industries that have thrived due to the pandemic include online retailing, led by Amazon, video conferencing such as Zoom, streaming entertainment such as Netflix, supermarkets, and sanitizing products. Residential housing has been resilient, driven by limited housing supply, historically low interest rates, and increased demand within suburban neighborhoods. While purchase mortgage applications were off 35% year-over-year in March and April of 2020, as of September 30, 2020, they are up 22%.

Major financial markets had a roller coaster of a year, up at record levels heading into COVID-19, dropping precipitously at the depths of the pandemic in March and April 2020, and rallying significantly during the second and third quarter of 2020, off of unprecedented monetary stimulus, slow re-opening of the economy, and optimism around an accelerated path toward a COVID-19 vaccine. Implied volatility spiked in March to a record daily close of 82.7%, surpassing the high of 80.9% reached in November 2008, but has come down since.

Major global market returns for the 2019-20 fiscal year were as follows: Domestic equity markets (Russell 3000 Index) returned 6.5%; International developed equity markets (MSCI World ex-US Index) returned -4.8%; Emerging equity markets (MSCI Emerging Markets Index) returned -3.4%; Fixed income markets (Bloomberg Barclays Aggregate Index) returned 8.7%; Real estate markets (NFI-ODCE Index) returned 2.2%; Absolute return markets (HFRI Fund of Funds Composite Index) returned -0.6%; and Commodities markets (Bloomberg Commodity Index) returned -17.4%.

Global equity markets experienced meaningful divergences on the year. Small capitalization stocks at -6.6% (Russell 2000 Index) significantly underperformed large capitalization stocks at 7.5% (Russell 1000 Index), which was similar to last year. Growth stocks at 23.3% (Russell 1000 Growth Index) continued to outperform value stocks at -8.8% (Russell 1000 Value Index), but in an even more exasperated fashion. The outperformance of growth and momentum stocks versus value stocks continues a multi-year trend, and a widening return spread between cheap and expensive stocks, in particular between strong performing Information Technology (+35.9%) and poor performing Financials (-13.9%) and Energy (-36.1%). Information Technology now makes up 33.6% of the S&P 500, but contributes only 16.3% to earnings per share (EPS). International equity stocks (MSCI ACWI ex-US) returned -4.8%, and meaningfully lagged domestic equity returns, partly due to the currency effect, as the U.S. dollar gained against other global currencies during the year (the U.S. dollar has since weakened against non-U.S. currencies).

Fixed income markets outpaced all other asset classes during the fiscal year, fueled by long dated government bonds. Treasuries generated returns of 10.4% (Bloomberg Barclays U.S. Treasury Index), as Treasury yields fell significantly during the pandemic as the Federal Open Market Committee cut interest rates by a full 1% to a new range of 0- 0.25% (The Fed Reserve has signaled that it will keep interest rates near zero through 2023). The 10-Year Treasury yield fell from 2.01% on June 30, 2019 to 0.66% on June 30, 2020. During the market sell off in March, credit spreads spiked significantly, with high yield spreads widening from 336 bps at the end of 2019 to a high of 1,100 bps in March 2020. High yield spreads tightened meaningfully during

the second quarter of 2020, and the Bloomberg Barclays U.S. Corporate High Yield Index ended the fiscal year flat. Investment grade corporate credit performed better, with the U.S. Investment Grade Credit Index returning 9.1% for the fiscal year. The broad based Bloomberg Barclays Aggregate index, which contains an equal mix of Treasuries, agency mortgages, and investment grade credit, generated a strong return of 8.7% during the year.

While financial markets have recovered significantly from their March 2020 lows, and the broader economy has shown some signs of improvement, there is a lot of uncertainty going forward. This includes the COVID-19 virus itself, where Europe is seeing a resurgence of new cases, and the United States has struggled to get the first wave under control, with expectation of an increase in cases during the fall and winter months ahead. The global economy has bounced back faster than expected; however, a full and sustainable recovery across jobs, business activity, and investment could be dependent on a safe and effective vaccine being developed and distributed. Other risks from the upcoming U.S. presidential election to geopolitical/trade issues with China could also be factors going forward. A pickup in market volatility and downside risk in asset prices should not be surprising going forward. As a reminder, SCERS' strategic asset allocation is structured to provide greater levels of diversification across economic environments and risk factors, outside of equities and bonds, which should serve SCERS well in a variety of market outcomes.

Asset Allocation

SCERS' investment program is structured around a strategic asset allocation model established by SCERS' Board with the assistance of SCERS' investment staff, general investment consultant Verus, alternative assets consultant Cliffwater LLC (Cliffwater), and real estate consultant The Townsend Group (Townsend). The objective of the asset allocation model is to ensure the diversification of investments in a manner that generates a desired rate of investment return with an acceptable level of investment risk. To achieve this, the asset allocation is broadly diversified across asset categories, asset classes, and within asset classes to provide consistent long term performance. The asset allocation targets are not tactical, but rather, are long term in nature, consistent with the long term nature of SCERS' benefit obligations. The asset allocation model is typically reviewed every three to five years, but the long term capital market assumptions for the various asset classes and sub-asset classes are reviewed and adjusted as appropriate each year. Research has shown that the asset allocation mix is the largest driver of investment performance. SCERS is scheduled to undergo its next asset liability modeling study in calendar year 2021.

SCERS' strategic asset allocation views risk exposures through multiple lenses, including functional and common factor exposures, in order to manage and maintain allocations that are aligned with SCERS' investment philosophy and objectives. This multiple lens approach uses a functional framework to group and classify portions of SCERS' portfolio in order to link segments that are exposed to similar economic environments and risk factors, and which would be expected to have similar roles and outcomes in a portfolio. The functional grouping takes a simplified approach at the asset category level, by breaking the portfolio into three asset categories, with greater complexity reserved at the asset class level. The asset categories include: (1) Growth; (2) Diversifying; and, (3) Real Return.

The Growth asset category includes those segments of the portfolio that tend to perform best in a high growth and low/moderate inflationary environment, including most equity and credit investments. In contrast, they tend to perform poorly during recessionary periods, when GDP growth is contracting, or during certain periods when unexpected inflation arises. Growth assets tend to comprise the dominant allocation within most institutional investment portfolios, including that of SCERS. The Diversifying asset category includes those segments of the portfolio which are expected to protect capital and perform better

than the Growth asset category during dislocated and stressed market environments, including traditional fixed income and diversifying absolute return strategies. The Real Return asset category includes those segments of the portfolio that protect against inflation, generate cash flow, and provide further portfolio diversification, including private real estate, infrastructure, energy, and agriculture investments, as well as liquid real return assets investments.

SCERS' strategic asset allocation has an expected return profile in line with SCERS' actuarial assumed rate of return, with heavy allocations to growth assets that can drive returns. However, it also maintains meaningful diversification, especially to investment strategies with low and negative correlations to equity markets that can reduce portfolio volatility and protect against significant market drawdowns. It is also expected to generate meaningful cash flow for SCERS' plan. The strategic asset allocation contains a meaningful allocation to higher returning, diversifying, and less liquid private market investments, so tracking SCERS' liquidity profile in order to maintain sufficient cash flows in order to meet benefit payment obligations is a key focus of the Board and SCERS' investment staff.

During the 2019-20 fiscal year, SCERS added a 1% dedicated cash allocation to the strategic asset allocation. Given that SCERS is a mature plan with a greater level of benefit payments going out than contributions coming in on an annual basis, a dedicated cash allocation helps close this gap in an environment where investment earnings fall short of target. Funding for the cash allocation came from a 1% reduction in the Domestic Equity portfolio. Another asset allocation change made during the year was transitioning the Commodities allocation to a diversified Liquid Real Return allocation. The combination of the added cash and liquid real return allocations translated to no change in the expected return profile, and a slight reduction in the risk profile of the plan.

SCERS' strategic asset allocation is summarized in the table below:

Asset Category/Asset Class	Target Allocation
Growth	58.0%
Domestic Equity	20.0
International Equity	20.0
Private Equity	9.0
Public Credit	2.0
Private Credit	4.0
Growth Absolute Return	3.0
Diversifying	25.0
Core Plus Fixed Income	10.0
US Treasury	5.0
Global Fixed Income	3.0
Diversifying Absolute Return	7.0
Real Return	16.0
Real Estate	7.0
Real Assets	7.0
Liquid Real Return	2.0
Opportunities	-
Cash	1.0
	100.0%

The implementation of the portfolio toward the targets identified in the strategic asset allocation continued during the fiscal year. It is anticipated that it will require a few years to reach the target allocation levels within the private market asset classes.

The performance summary section of the Chief Investment Officer's Report will highlight the performance of the asset categories, and their underlying asset classes. However, other portions of the CAFR will highlight activity and exposures by major asset classes only. As an example, Growth Absolute Return and Diversifying Absolute Return will be referenced within an aggregate Absolute Return portfolio. Likewise, Public Credit, Core Plus Fixed Income, U.S. Treasury, and Global Fixed Income will be referenced within an aggregate Fixed Income portfolio.

Investment Portfolio Implementation

In addition to providing assistance to the Board in establishing the strategic asset allocation model, SCERS' investment staff and consultants assist in developing investment policy statements; conduct searches for and recommend the selection of investment managers; monitor investment manager performance and compliance; advise on developments in the investment markets; and analyze and develop recommendations for possible tactical adjustments and new investment initiatives.

SCERS utilizes external investment managers to invest the System's assets. As of June 30, 2020, SCERS' assets were invested across: (1) Domestic Equity – five separate account portfolios and two commingled funds; (2) International Equity – four separate account portfolios and three commingled fund partnerships; (3) Fixed Income - four separate account portfolios and one global fixed income fund; (4) Absolute Return – three fund-of-funds separate account portfolios and 13 fund partnerships; (5) Private Equity – five fund-of-funds partnerships and 56 fund partnerships; (6) Private Credit – one separate account portfolio and 10 fund partnerships; (7) Real Estate – eight core real estate fund partnerships, nine value-add real estate fund partnerships, and six opportunistic real estate fund partnerships; (8) Real Assets – two separate account portfolios and 20 fund partnerships; (9) Liquid Real Return – one separate account and one commingled fund; and, (10) Opportunities - one opportunistic credit fund partnership.

Significant activity during the fiscal year included the following:

- In Absolute Return, SCERS continued implementation of the diversifying absolute return portfolio by making two new fund investments.
- In Private Equity, SCERS continued implementation of the direct private equity investment platform, making eight fund commitments during the fiscal year.
- In Private Credit, SCERS continued implementation of the direct private credit investment platform, making three fund commitments during the fiscal year.
- In Real Estate, SCERS continued implementation of the non-core real estate platform, making one fund commitment during the fiscal year.
- In Real Assets, SCERS continued implementation of the direct real assets investment platform, making one new fund commitment during the fiscal year.

Due to the longer investment period for private market commitments, the importance of maintaining vintage year diversification, and the objective of investing with top tier managers, it takes several years for target allocation levels to be reached in these asset classes. Private Equity reached its target allocation of 9% during the 2018-19 fiscal year; however, Private Credit and Real Assets will require a few more years to reach their targets.

SCERS' custodial bank is State Street Bank and Trust (State Street). In addition to asset custody services (including performance measurement), State Street provides securities lending services to SCERS and, through State Street Global Advisors and State Street Global Markets, administers a portfolio overlay program and a brokerage commission recapture program, respectively. The portfolio overlay program assures that SCERS' portfolio exposures are consistent with the strategic asset allocation targets through cost-effective rebalancing, using investment proxies to close gaps relative to target allocation levels and to eliminate 'cash drag'. For the fiscal year ended June 30, 2020, SCERS earned a net income of \$1.2 million from securities lending and received commission recapture income of \$27,000.

SCERS' primary legal services regarding the investment program are provided by specialized outside legal counsel and fiduciary counsel.

During the fiscal year, investment educational sessions were provided to the Board by SCERS' staff, investment consultants, and various investment managers to assist the Board with updates on the macroeconomic environment, better understanding existing investments, and possible new investment mandates. The educational sessions included presentations regarding: (1) proxy voting; (2) capital market assumptions; (3) global markets outlook; (4) securities litigation; (5) portfolio rebalancing; and, (6) global markets update.

SCERS Investment Objectives

SCERS' investment objectives are set forth in the Board's Master Investment Policy Statement (Investment Policy) and through customized investment policy statements for each asset class.

At the highest level, SCERS' investment objectives are:

OVERARCHING PLAN OBJECTIVES:

- Provide for current and future benefit payments to plan participants and their beneficiaries, and sustain the plan over its useful life.
- Diversify plan assets as its main defense against large market drawdowns.
- Preserve a degree of liquidity ample to meet benefit payments and capital calls, without incurring substantial transaction costs or "fire sales" of illiquid holdings.
- Incur costs that are reasonable and consistent with industry standards.
- Achieve funding goals, including the maintenance of funded status and manageable, consistent contribution rates.
- Maintain risk exposure required to meet return requirements, while limiting drawdown exposure.

INVESTMENT PERFORMANCE OBJECTIVES:

- Generate returns in excess of policy benchmarks at the total fund and asset class levels over rolling three-year periods.
- Achieve real (after inflation) returns at the total fund level that are at or above the actuarial real return (assumed return less per capita pay growth) over complete market cycles.
- For asset classes and actively managed portfolios, achieve net returns that exceed policy benchmarks, and rank in the top half of a competitive, after-fee universe.

Proxy Voting Guidelines and Procedures

As a fiduciary, the Board has an obligation to manage SCERS' assets in the best interest of the plan participants. The Board retains third-party services to provide guidance for voting proxies and acting on corporate actions, such as mergers and acquisitions. For the fiscal year ended June 30, 2020, a majority of proxies were voted through an electronic voting platform provided by Institutional Shareholder Services, with the assistance of research and analysis provided by Institutional Shareholder Services and Glass Lewis & Co. During the fiscal year, SCERS renewed its contract with Institutional Shareholder Services.

Summary of Investment Results

SCERS monitors capital market investment returns through reference to recognized and easily obtainable market indices, which are used as asset class benchmarks. The benchmark index performance by asset class for one, three, and five years is shown on the Investment Results schedule. The performance of the asset categories is also provided; however, since these were implemented in 2017, performance goes back only to that year. The asset class benchmark returns are weighted by the asset allocation to provide a policy-weighted return based on SCERS' total fund. SCERS presents its returns using a time-weighted rate of return methodology based upon fair values. SCERS' general investment consultant, Verus, prepared the investment returns cited in this section using information it received from SCERS' custodian bank and investment managers. The total fund performance is reported gross of fees; however, several underlying asset classes are net of fees, including Private Equity, Public Credit, Private Credit, Growth and Diversifying Absolute Return, non-core Real Estate, and Real Assets.

SCERS' investment performance for the fiscal year ended June 30, 2020 was positive, but below SCERS' actuarial return due to the impact of the COVID-19 pandemic on financial markets. Returns were mixed across asset classes, with Treasuries, Core Plus Fixed Income, Private Equity, and Domestic Equity generating the strongest positive absolute returns, while Real Assets and Public Credit generated the largest negative returns.

For the period, SCERS' total fund return was 2.9%, gross of investment management fees, and 2.7%, net of investment management fees. The gross return for the fiscal year was 1.4% above SCERS' policy weighted benchmark return of 1.5%, but was significantly below the actuarial return objective of 7%. Over the trailing three-year period, SCERS' annualized investment return was 6.9% gross and 6.6% net. The three-year annualized return was slightly below the actuarial return objective of 7%, but well above SCERS' policy benchmark return of 5.3%. Over the trailing five-year period, SCERS' annualized investment return was 6.6% gross and 6.4% net. The five-year annualized return was also slightly below the actuarial return objective of 7%, but above SCERS' policy benchmark return of 5.8%.

SCERS also assesses its investment performance relative to a peer group of other public funds utilizing a series of universe comparisons provided by Verus. For the fiscal year, the median public fund in the InvestorMetrics Universe of public funds with assets of greater than \$1 billion was 1.3%. SCERS' return of 2.9% ranked in the top 22nd percentile.

Growth Asset Category

The Growth asset category is comprised of the following asset classes: Domestic Equity, International Equity, Private Equity, Public Credit, Private Credit, and Growth Absolute Return. The Growth asset category returned 2% for the fiscal year, gross of fees. The return was above the policy benchmark return of 0.7%. For the three-year period, SCERS' Growth asset category annualized return was 7.6%, gross of fees, above the policy

benchmark return of 6.1%. The Growth asset category and benchmark return is a weighted average of the underlying asset class and benchmark returns, based on their weights within SCERS' strategic asset allocation.

Domestic Equity returned 6% for the fiscal year, gross of fees. The return was below the benchmark Russell 3000 Index return of 6.5%. For the three-year period, SCERS' Domestic Equity annualized return was 9.9%, gross of fees, slightly below the Russell 3000 Index benchmark return of 10%. In the domestic equity segment of the InvestorMetrics Universe, SCERS ranked in the top 24th percentile for the fiscal year and in the top 25th percentile for the three-year period.

International Equity returned -1.8% for the fiscal year, gross of fees, which was above the benchmark MSCI ACWI ex-U.S. Index return of -4.4%. Annualized performance for the three-year period of 3.5%, gross of fees, was above the benchmark return of 1.6%. In the international equity segment of the InvestorMetrics Universe, SCERS ranked in the top 34th percentile for the fiscal year and in the top 18th percentile for the three-year period.

The Private Equity asset class generated a return of 5.2%, net of fees for the fiscal year, compared to the -0.6% return of the asset class benchmark, the Thomson Reuters C/A All Private Equity Index. For the three-year period, SCERS' Private Equity asset class returned 16.5%, compared to the benchmark return of 8.6%. Another longer-term comparison measure is the Russell 3000 Index plus 3%, which returned -6.1% and 7% for the fiscal year and three-year period, respectively. In the private equity segment of the InvestorMetrics Universe, SCERS' Private Equity return ranked in the top 30th percentile for the fiscal year and in the top 9th percentile for the three-year period. Please note that the returns of the Private Equity asset class and benchmark are lagged one quarter.

SCERS' Public Credit portfolio generated a fiscal year -6.1% return, net of fees, which was well below the custom benchmark return of -1.7% (comprised of 50% BofA Merrill Lynch U.S. HY Master II Index / 50% Credit Suisse Leveraged Loans Index). For the three-year period, the Public Credit portfolio annualized return was 0%, net of fees, compared to the benchmark return of 2.6%.

The Private Credit asset class generated a return of 0.1%, net of fees for the fiscal year, compared to the -7.5% return of the asset class benchmark, the Credit Suisse Leveraged Loan Index plus 2%. For the three-year period, SCERS' Private Credit asset class returned 4%, compared to the benchmark return of 1.3%. Please note that the returns of the Private Credit asset class and benchmark are lagged one quarter.

SCERS' Growth Absolute Return investments generated a fiscal year -2.8% return, net of fees. For the three-year period, the Growth Absolute Return portfolio annualized return was 1.2%. The policy benchmark for the Growth Absolute Return investments is the HFRI FoF Composite Index plus 1%, which returned 1.1% and 3.1% in the fiscal year and three-year periods, respectively.

Diversifying Asset Category

The Diversifying asset category is comprised of the following asset classes: Public Fixed Income (Core Plus Fixed Income, U.S. Treasury, Global Fixed Income) and Diversifying Absolute Return. The Diversifying asset category returned 5.3% for the fiscal year, gross of fees. The return was below the policy benchmark return of 5.7%. For the three-year period, SCERS' Diversifying asset category annualized return was 3.9%, gross of fees, slightly below the policy benchmark return of 4.2%. The Diversifying asset category and benchmark return is a weighted average of the underlying asset class and benchmark returns, based on their weights within SCERS' strategic asset allocation.

SCERS' Core Plus Fixed Income investments generated a fiscal year 8.7% return, gross of fees, which was in line with the benchmark Bloomberg Barclays Aggregate Index return of 8.7%. For the three-year period, the Core Plus Fixed Income portfolio annualized return was 5.8%, gross of fees, compared to the benchmark return of 5.3%.

SCERS' U.S. Treasury segment generated a fiscal year 10.4% return, gross of fees, which was in line with the benchmark Bloomberg Barclays U.S. Treasury Index return of 10.4%. The U.S. Treasury portfolio was created during the 2017-18 fiscal year, so there is not a full three years of data to report.

SCERS' Global Fixed Income investments generated a fiscal year 0.4% return, gross of fees, which was below the custom benchmark return (comprised of 80% Citigroup WGBI Index / 20% JP Morgan GBI EM Diversified Index) of 3.3%. For the three-year period, the Global Fixed Income portfolio annualized return was 1.7%, gross of fees, compared to the benchmark return of 3.5%.

SCERS' Diversifying Absolute Return investments generated a fiscal year -1.2% return, net of fees. For the three-year period, the Diversifying Absolute Return portfolio annualized return was 0.3%. The policy benchmark for the Diversifying Absolute Return investments is the HFRI FoF Conservative Index, which returned -1.1% and 1.7% in the fiscal year and three-year periods, respectively.

Real Return Asset Category

The Real Return asset category is comprised of the following asset classes: Real Estate, Real Assets, and Liquid Real Return. The Real Return asset category returned -2.5% for the fiscal year, gross of fees. The return was above the policy benchmark return of -3.6%. For the three-year period, SCERS' Real Return asset category annualized return was 5.5%, gross of fees, above the policy benchmark return of 3.1%. The Real Return asset category and benchmark return is a weighted average of the underlying asset class and benchmark returns, based on their weights within SCERS' strategic asset allocation. The Real Return asset category return includes the SSGA Real Assets Strategy, which is the proxy used within SCERS' Overlay Program to replicate exposure while the asset class is implemented.

The Real Estate asset class generated a return of 4%, gross of fees for the fiscal year, compared to the 3.2% return of the custom asset class benchmark (65% NFI-ODCE / 35% NFI-ODCE plus 1%). For the three-year period, SCERS' Real Estate asset class returned 7.7%, compared to the benchmark return of 6.1%. In the real estate segment of the InvestorMetrics Universe, SCERS' Real Estate return ranked in the top 12th percentile for the fiscal year period and the top 5th percentile for three-year period. Please note that the returns of some segments of the Real Estate asset class and benchmark are lagged one quarter.

The Real Assets asset class generated a return of -9.6%, net of fees for the fiscal year, compared to the -9.6% return of the asset class benchmark, (comprised of 45% Cambridge Associates Private Infrastructure Index / 35% Cambridge Associates Private Energy Index / 10% NCREIF Agriculture index / 10% NCREIF Timber Index). The dramatic fall in energy prices during the first quarter of 2020 negatively impacted SCERS' Real Assets returns for the fiscal year. For the three-year period, SCERS' Real Assets asset class returned 4.8%, compared to the benchmark return of 1.4%. Please note that the returns of the Real Assets asset class and benchmark are lagged one quarter.

SCERS' Liquid Real Return asset class generated a fiscal year -5.5% return, gross of fees, which was above the benchmark return of -6.9%. The Liquid Real Return portfolio was created in June of 2019, so there is not a full three years of data to report.

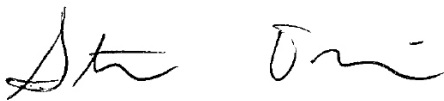

Opportunities Portfolio

The Opportunities investments are tactical investments across SCERS' investible asset classes and universe. When an Opportunities investment is made, its capital is drawn from the asset class which best fits the risk and return characteristics of the underlying investments. The Opportunities portfolio only contains one investment as of June 30, 2020. For the fiscal year, SCERS' Opportunities investment achieved a 5.1% net return, which was above SCERS' policy index 1.5% benchmark return. For the three-year period, SCERS' Opportunities portfolio returned 2.5%, compared to the benchmark return of 5.3%.

Additional information regarding SCERS' investment program can be found on the pages immediately following this report.

Respectfully submitted,

Steve Davis
Chief Investment Officer

Board of Retirement
Sacramento County Employees' Retirement System
980 9th Street, Suite 1900
Sacramento, CA 95814-2738

Re: Actuarial Valuation for the Sacramento County Employees' Retirement System

Dear Members of the Board:

Segal prepared the June 30, 2020 annual actuarial valuation of the Sacramento County Employees' Retirement System. We certify that the valuation was performed in accordance with generally accepted actuarial principles and practices and SCERS' funding policy that underwent a substantive review by the Board in 2013. In particular, it is our understanding that the assumptions and methods used for funding purposes meet the parameters set by the Actuarial Standards of Practice (ASOPs).

As part of the June 30, 2020 actuarial valuation, Segal conducted an examination of all participant data for reasonableness. Summaries of the employee data used in performing the actuarial valuations over the past several years are provided in our valuation report. We did not audit the System's financial statements. For actuarial valuation purposes, Plan assets are valued at Actuarial Value. Under this method, the assets used to determine employer contribution rates take into account fair value by recognizing the differences between the total actual investment return at fair value and the expected investment return from the prior six years. Investment gains/losses are recognized over a seven-year period and the deferred return is further adjusted, if necessary, so that the actuarial value of assets will stay within 30% of the fair value of assets.

One of the general goals of an actuarial valuation is to establish contribution rates which, over time, will remain level as a percentage of payroll unless Plan benefit provisions are changed. Actuarial funding is based on the Entry Age Cost Method. Under this method, the employer contribution rate provides for current cost (normal cost) plus a level percentage of payroll to amortize any unfunded actuarial accrued liability (UAAL). The UAAL is amortized over different periods depending on the source.

Board of Retirement
 Sacramento County Employees' Retirement System
 October 27, 2020
 Page 2

The System's remaining outstanding balance of the June 30, 2012 UAAL is amortized as a level percentage of payroll over a declining 23-year period (with 15 years remaining as of June 30, 2020). Effective with the June 30, 2013 valuation, the change in UAAL that arises due to actuarial gains or losses or from changes in actuarial assumptions or methods at each valuation is amortized as a level percentage of payroll over its own declining 20-year period. Any change in UAAL that arises due to plan amendments will be amortized as a level percentage of payroll over its own declining 15-year period and any change in UAAL due to retirement incentive programs will be amortized as a level percentage of payroll over its own declining period of up to 5 years. The progress being made towards meeting the funding objective through June 30, 2020 is illustrated in the Schedule of Funding Progress.

Notes number 1, 4 and 5 to the Basic Financial Statements and the Required Supplemental Information (RSI) included in the Financial Section were prepared by the System based on the results of the Governmental Accounting Standards Board Statement 67 (GASBS 67) actuarial valuation as of June 30, 2020 and the Actuarial Valuation and Review as of June 30, 2020, both prepared by Segal. For the Financial Section of the Comprehensive Annual Financial Report (CAFR), Segal provided the Schedule of Changes in Net Pension Liability and Schedule of Employer Contributions as shown in the RSI. A listing of the other supporting schedules Segal prepared for inclusion in the Actuarial and Statistical Sections of the System's CAFR is provided below. These schedules were prepared based on the results of the actuarial valuation as of June 30, 2020 for funding purposes. All other schedules in the Actuarial and Statistical Sections of the System's CAFR were prepared by the System.

1. Retirees and beneficiaries added to and removed from retiree payroll;
2. Schedule of funded liabilities by type; and
3. Schedule of retiree members by type of benefit.

The valuation assumptions included in the Actuarial Section, including the assumptions for determining optional form of benefits, were adopted by the Retirement Board based on the June 30, 2019 Actuarial Experience Study recommending assumptions for use starting with the June 30, 2020 valuation. It is our opinion that the assumptions used in the June 30, 2020 valuation produce results, which, in the aggregate, anticipate the future experience of the Plan. Actuarial valuations are performed on an annual basis. An experience analysis is performed every three years. The next experience analysis is due to be performed as of June 30, 2022 and assumptions approved in that analysis will be applied in the June 30, 2023 valuation.

In the June 30, 2020 valuation, the ratio of the valuation assets to actuarial accrued liabilities decreased from 81.6% to 80.6%. The employer's rate has increased from 29.35% of payroll to 31.42% of payroll (after the two-year phase-in of the change in UAAL rate due to changes in actuarial assumptions included in the June 30, 2019 Actuarial Experience Study), while the employee's rate has increased from 11.54% of payroll to 12.35% of payroll. The increase in the employer's rate and employee's rate is primarily a result of changes in actuarial assumptions.

Board of Retirement
Sacramento County Employees' Retirement System
October 27, 2020
Page 3

In the June 30, 2020 valuation, the actuarial value of assets excluded \$250.4 million in deferred investment losses, which represented about 3% of the fair value of assets. If these deferred investment losses were recognized immediately in the actuarial value of assets, the funded percentage would decrease from 80.6% to 78.6% and the aggregate employer contribution rate would increase from 31.42% of payroll to 33.1% of payroll.

The undersigned are Members of the American Academy of Actuaries and we meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein.

Sincerely,

Paul Angelo, FSA, MAAA, FCA, EA
Senior Vice President and Actuary

Andy Yeung, ASA, MAAA, FCA, EA
Vice President and Actuary

SUMMARY OF ACTUARIAL ASSUMPTIONS AND METHODS

GASB Statement No. 67 rules only redefine pension liability and expense for financial reporting purposes, and do not apply to contribution amounts for pension funding purposes. Employers and pension plans can still develop and adopt funding policies under current practices. SCERS' Board of Retirement and management staff are responsible for establishing and maintaining the System's funding policy. When measuring the total pension liability, GASB uses the same actuarial cost method (Entry Age Method) and the same type of discount rate (expected return on assets) as SCERS uses for funding. This means that the Normal Cost component of the annual plan cost is determined on the same basis for funding and financial reporting.

The following assumptions and methods were based on the June 30, 2019 actuarial experience study, which was adopted by the Board in May 2020. These assumptions and methods were used to complete the June 30, 2020 actuarial valuation report.

Valuation Interest Rate and Rate of Return on Investments:	6.75%, net of administration and investment expenses
Inflation Rate:	2.75%
Real Across-the-Board Salary Increase:	0.25%
Projected Salary Increases:	4.25% - 10.50%
	Varying by service plus merit and longevity increases, and includes inflation at 2.75% plus real across-the-board salary increase of 0.25%.
Member Contribution Crediting Rate:	5-year Treasury rate, assuming sufficient net investment earnings
Post-Retirement Cost-of-Living Adjustment:	
Miscellaneous Tier 1	2.75%
Miscellaneous Tier 2	0.00%
Miscellaneous Tier 3	2.00%
Miscellaneous Tier 4	2.00%
Miscellaneous Tier 5	2.00%
Safety Tier 1	2.75%
Safety Tier 2	2.00%
Safety Tier 3	2.00%
Safety Tier 4	2.00%
Post-Retirement Mortality:	
a) Service	<p>Miscellaneous Members - Pub-2010 General Healthy Retiree Amount-Weighted Above-Median Mortality Table (separate tables for males and females) with rates increased by 10%, projected generationally with the two-dimensional mortality improvement scale MP-2019.</p> <p>Safety Members - Pub-2010 Safety Healthy Retiree Amount-Weighted Above-Median Mortality Table (separate tables for males and females) with rates decreased by 5% for males, projected generationally with the two-dimensional mortality improvement scale MP-2019.</p>

SUMMARY OF ACTUARIAL ASSUMPTIONS AND METHODS (CONTINUED)

b) Disability	Miscellaneous Disabled Members - Pub-2010 Non-Safety Disabled Retiree Amount-Weighted Mortality Table (separate tables for males and females), projected generationally with the two-dimensional mortality improvement scale MP-2019.
	Safety Disabled Members - Pub-2010 Safety Disabled Retiree Amount-Weighted Mortality Table (separate tables for males and females), projected generationally with the two-dimensional mortality improvement scale MP-2019.
	All Beneficiaries - Pub-2010 Contingent Survivor Amount-Weighted Above-Median Mortality Table (separate tables for males and females), projected generationally with the two-dimensional mortality improvement scale MP-2019.
Withdrawal Rates and Service Retirement Rates:	Refer to the June 30, 2019 Actuarial Experience Study.
Pre-Retirement Mortality:	Miscellaneous Members - Pub-2010 General Employee Amount-Weighted Above-Median Mortality Table (separate tables for males and females), projected generationally with the two-dimensional mortality improvement scale MP-2019.
	Safety Members - Pub-2010 Safety Employee Amount-Weighted Above-Median Mortality Table (separate tables for males and females), projected generationally with the two-dimensional mortality improvement scale MP-2019.
Mortality Rates for Member Contributions:	Miscellaneous Members - Pub-2010 General Healthy Retiree Amount-Weighted Above-Median Mortality Table (separate tables for males and females) with rates increased by 10%, projected 30 years (from 2010) with the two-dimensional mortality improvement scale MP-2019, weighted 40% male and 60% female.
	Safety Members - Pub-2010 Safety Healthy Retiree Amount-Weighted Above-Median Mortality Table (separate tables for males and females) with rates decreased by 5% for males, projected 30 years (from 2010) with the two-dimensional mortality improvement scale MP-2019, weighted 75% male and 25% female.
Disability Rates:	Miscellaneous Members - 40% of disabled Miscellaneous members would receive a duty disability, and 60% will be assumed to receive a non-duty disability.
	Safety Members - 90% of disabled Safety members would receive a duty disability, and 10% will be assumed to receive a non-duty disability.
Average Entry Ages:	Miscellaneous Members – 35 Safety Members – 29
Percentage of Members Married at Retirement:	Male Members – 80% Female Members – 55%
Retirement Age for Deferred Vested Members:	Miscellaneous Members – 59 Safety Members – 52

SUMMARY OF ACTUARIAL ASSUMPTIONS AND METHODS (CONTINUED)

Percentage Eligible for Reciprocal Benefits:	Miscellaneous Members – 30% Safety Members – 40%
Actuarial Value of Assets:	The fair value of assets less unrecognized returns in each of the last six years. Unrecognized return is equal to the difference between actual and expected returns on a fair value basis and is recognized over a seven-year period. The Actuarial Value of Assets (AVA) is limited by a 30% corridor; the AVA cannot be less than 70% of the fair value of assets, nor greater than 130% of the fair value of assets.
Valuation Value of Assets:	Actuarial value of assets reduced by the value of non-valuation reserves and designations.
Actuarial Cost Method:	Entry Age Actuarial Cost Method. Entry Age is the age on the valuation date minus years of service. Normal Cost and Actuarial Accrued Liability are calculated on an individual basis and are based on costs allocated as a level percentage of compensation.
Amortization Policy:	The UAAL established as a result of the Early Retirement Incentive Program for LEMA members is amortized over a 10-year period beginning June 30, 2010. The balance of the UAAL as of June 30, 2012 shall be amortized separately from any future changes in UAAL over a period of 23 years as of June 30, 2012.
	Any new UAAL as a result of actuarial gains or losses identified in the annual valuation as of June 30 will be amortized over a period of 20 years.
	Any new UAAL as a result of changes in actuarial assumptions or methods will be amortized over a period of 20 years.
	The change in UAAL as a result of any Plan amendments will be amortized over a period of 15 years and the change in UAAL resulting from retirement incentive programs will be amortized over a period of up to 5 years.
Changes in Actuarial Assumptions:	Refer to the June 30, 2019 Actuarial Experience Study.

SUMMARY OF PLAN PROVISIONS

Briefly summarized below are the major provisions of the County Employees' Retirement Law of 1937, as amended through June 30, 2020, that are applicable to the Sacramento County Employees' Retirement System, a cost-sharing multiple-employer defined benefit pension plan.

Membership

Miscellaneous employees entering before September 27, 1981 are Tier 1 members. Miscellaneous employees entering on or after September 27, 1981 and June 27, 1993 are members of Tier 2 or Tier 3, respectively. County Miscellaneous employees entering on or after January 1, 2012 but prior to January 1, 2013 are members of Tier 4. Miscellaneous employees entering on or after January 1, 2013 are members of Tier 5. Safety members entering before June 25, 1995 are Tier 1 members. Safety members entering on or after June 25, 1995 are Tier 2 members. County Safety employees entering on or after January 1, 2012 but prior to January 1, 2013 are members of Tier 3. Safety members entering on or after January 1, 2013 are members of Tier 4.

Final Average Salary

Final average salary (FAS) is defined as the highest 12 consecutive months of compensation earnable for Miscellaneous Tier 1 and Safety Tier 1 and highest 36 consecutive months for Miscellaneous Tier 2, Tier 3, Tier 4 and Tier 5 and Safety Tier 2, Tier 3 and Tier 4.

Return of Contributions

Upon separation from service, a member may elect to leave his or her contributions on deposit. If the member has five or more years of service, he or she may elect to receive a deferred benefit when eligible for retirement. If the member has less than five years of service, he or she may request a return of contributions, plus interest, at any time.

Service Retirement Benefit

Miscellaneous Tier 1, Tier 2, Tier 3 and Tier 4 and Safety Tier 1, Tier 2 and Tier 3 members with 10 years of service who have attained the age of 50 are eligible to retire. All members with 30 years of service (20 years for Safety), regardless of age, are eligible to retire.

Miscellaneous Tier 5 and Safety Tier 4 members with 5 years of service who have attained the age of 52 (age 50 for Safety) are eligible to retire.

The benefit expressed as a percentage of monthly FAS per year of service, depending on age at retirement, is illustrated below for typical ages. For members whose benefits are integrated with Social Security, the benefit is reduced by one-third of the percentage shown below times the first \$350 of monthly FAS per year of service after January 1, 1956.

Age	Miscellaneous Tier 1, 2 and 3	Miscellaneous Tier 4	Miscellaneous Tier 5	Safety Tier 1 and 2	Safety Tier 3	Safety Tier 4
50	1.48%	1.18%	N/A	3.00%	2.29%	2.00%
55	1.95	1.49	1.30%	3.00	3.00	2.50
60	2.44	1.92	1.80	3.00	3.00	2.70
62	2.61	2.09	2.00	3.00	3.00	2.70
65	2.61	2.43	2.30	3.00	3.00	2.70
67 and over	2.61	2.43	2.50	3.00	3.00	2.70

Disability Benefit

Members with five years of service, regardless of age, are eligible for non-service connected disability.

For Miscellaneous Tier 1 members, the benefit is 1.5% (1.8% for Safety Tier 1 members) of FAS for each year of service. If this benefit does not equal one-third of FAS, the benefit is increased by the same percentage of FAS for the years which would have been credited to age 65 (age 55 for Safety members), but the total benefit in this case cannot be more than one-third of FAS.

For Tier 2, Tier 3, Tier 4 and Tier 5 members, the benefit is 20% of FAS for the first five years of service plus 2% for each additional year for a maximum of 40% of FAS.

If the disability is service connected, the member may retire regardless of length of service, with a benefit of 50% of FAS or 100% Service Retirement benefit, if greater.

Death Benefit (Before Retirement)

In addition to the return of contributions, a death benefit is payable to the member's beneficiary or estate equal to one month's salary for each completed year of service under the retirement system, based on the final year's average salary, but not to exceed six (6) month's salary.

If a member dies while eligible for service retirement or non-service connected disability, the spouse receives 60% of the allowance that the member would have received for retirement.

If a member dies in the performance of duty, the spouse or minor child receives 50% of the member's final average salary or 100% of Service Retirement benefit, if greater.

Death Benefit (After Retirement)

If a member dies after retirement, a \$4,000 lump sum burial allowance is paid to the beneficiary or estate. If the retirement was for service connected disability, 100% of the member's allowance as it was at death is continued to the eligible spouse for life.

If the retirement was for other than service connected disability and the member elected the unmodified option, 60% of the member's allowance is continued to an eligible spouse for life.

An eligible spouse is a surviving spouse who was married to the member at least one year prior to the date of retirement.

Maximum Benefit

The maximum benefit payable to a member or beneficiary is 100% of FAS for Miscellaneous Tier 1, Tier 2, Tier 3 and Tier 4 and Safety Tier 1, Tier 2 and Tier 3. There is no maximum benefit for Miscellaneous Tier 5 and Safety Tier 4 members.

Cost-of-Living Adjustments

The maximum increase in retirement allowance is 4% per year for Miscellaneous Tier 1 and Safety Tier 1 members and 2% for Safety Tier 2, Tier 3 and Tier 4, and Miscellaneous Tier 3, Tier 4 and Tier 5 members.

Miscellaneous Tier 2 members have no cost-of-living benefit. The cost-of-living increases effective in the month of April are based on the average annual change in the Consumer Price Index for the calendar year preceding April.

SUMMARY OF PLAN PROVISIONS (CONTINUED)

Contribution Rates

Basic member contribution rates are based on the age-nearest birthday at entry into the System (single rate for entrants after January 1, 1975). The rates are designed to provide an average annuity at age 55 equal to 1/240 of FAS for Miscellaneous Tier 1, 2 and 3 members, at age 60 equal to 1/120 of FAS for Miscellaneous Tier 4 members and 1/100 of FAS at age 50 for Safety Tier 1, Tier 2 and Tier 3 members. For Miscellaneous Tier 5 and Safety Tier 4 members, the rates are 50% of the Normal Cost rate. For members integrated with Social Security, the above contributions are reduced by one-third of that portion of such contribution payable with respect to the first \$350 of monthly salary. Cost-of-living contribution rates are designed to pay for one-half of the future cost-of-living costs. Member contributions are refundable upon termination from the system.

SCHEDULE OF ACTIVE MEMBER VALUATION DATA

Events affecting year to year comparability:

- 6/30/11 - Modification in non-economic assumptions.
- 6/30/12 - Investment return assumption decreased from 7.75% to 7.50%;
- Inflation assumption decreased from 3.50% to 3.25%;
- Salary increase assumption decreased; and
- COLA increase assumption for Tier 1 decrease from 3.40% to 3.25%.
- 6/30/13 - Actuarial cost method changed from Aggregate Entry Age Normal Cost Method to Individual Entry Age Normal Cost Method; and
- Changes to the amortization periods used for various future changes in liability:
 - UAAL established as a result of Early Retirement Incentive Program for LEMA is amortized over a 10-year period beginning June 30, 2010;
 - UAAL as a result of actuarial gains or losses as of June 30 will be amortized over a 20-year period;
 - UAAL as a result of changes in actuarial assumptions or methods to be amortized over a 20-year period;
 - Change in UAAL as a result of plan amendments to be amortized over a 15-year period; and
 - UAAL as a result from retirement incentive programs will be amortized over a period up to 5 years.
- 6/30/14 - Changes to post-retirement mortality rates and termination rates before retirement;
- Changes to retirement age and benefit for deferred vested members; and
- Changes to annual rates of compensation increase.
- 6/30/17 - Investment return assumption decreased from 7.50% to 7.00%;
- Inflation assumption decreased from 3.25% to 3.00%;
- Salary increase assumption decreased while merit and promotional component of salary increase assumption increased;
- COLA increase assumption for Tier 1 decrease from 3.25% to 3.00%; and
- Modification in non-economic assumptions.
- 6/30/20 - Investment return assumption decreased from 7.00% to 6.75%;
- Inflation assumption decreased from 3.00% to 2.75%;
- Salary increase assumption decreased while merit and promotional component of salary increase assumption increased;
- COLA increase assumption for Tier 1 decreased from 3.00% to 2.75%; and
- Modification in non-economic assumptions.

*Includes contingency reserve and retiree death benefit reserves.

** Covered payroll is based on actuarial assumed salary growth.

PROBABILITIES OF SEPARATION PRIOR TO RETIREMENT

MORTALITY RATE (%)

Age	Miscellaneous		Safety	
	Male	Female	Male	Female
20	0.04%	0.01%	0.04%	0.01%
25	0.02	0.01	0.03	0.02
30	0.03	0.01	0.04	0.02
35	0.04	0.02	0.04	0.03
40	0.06	0.03	0.05	0.04
45	0.09	0.05	0.07	0.06
50	0.13	0.08	0.10	0.08
55	0.19	0.11	0.15	0.11
60	0.28	0.17	0.23	0.14
65	0.41	0.27	0.35	0.20

Note: Generational projections beyond the base year (2010) are not reflected in the above mortality rates. All Miscellaneous pre-retirement deaths are assumed to be nonservice-connected. For Safety, 50% pre-retirement deaths are assumed to be nonservice-connected and the rest are assumed to be service-connected.

DISABILITY RATE (%)

Age	Miscellaneous	Safety
20	-%	0.05%
25	0.01	0.05
30	0.02	0.08
35	0.04	0.22
40	0.08	0.36
45	0.16	0.46
50	0.23	0.68
55	0.31	0.92
60	0.41	1.12
65	0.63	-

Note: For Miscellaneous, 40% of disabilities are assumed to be service-connected disabilities and the other 60% are assumed to be nonservice-connected disabilities. For Safety, 90% of disabilities are assumed to be service-connected disabilities and the other 10% are assumed to be nonservice-connected disabilities.

Source: Actuarial Valuation report as of June 30, 2020.

WITHDRAWAL RATE (%)
LESS THAN FIVE YEARS OF SERVICE

Years of Service	Miscellaneous	Safety
Less than 1	13.00%	5.00%
1 - 2	8.00	4.50
2 - 3	6.50	4.00
3 - 4	5.50	2.50
4 - 5	5.25	2.50

Note: 55% of the Miscellaneous members and 50% of the Safety members are assumed to elect a withdrawal of contributions upon separation. The remaining 45% and 50% of Miscellaneous and Safety members, respectively, are assumed to elect a deferred retirement benefit.

WITHDRAWAL RATE (%)
FIVE OR MORE YEARS OF SERVICE

Age	Miscellaneous	Safety
20	5.25%	2.00%
25	5.25	2.00
30	5.10	2.00
35	4.40	1.55
40	3.40	1.10
45	2.70	1.00
50	2.44	1.00
55	2.34	1.00
60	2.24	1.00
65	1.48	-

Note: 30% of the Miscellaneous members and 15% of the Safety members are assumed to elect a withdrawal of contributions upon separation. The remaining 70% and 85% of Miscellaneous and Safety members, respectively, are assumed to elect a deferred retirement benefit. No withdrawal is assumed after a member is eligible to retire.

SECTION 5

Statistical

SUMMARY OF STATISTICAL DATA

Issued in May 2004, pronouncement GASB Statement No. 44, *Economic Conditioning Reporting: The Statistical Section*, establishes and modifies requirements related to the supplementary information presented in this section of the report.

The pension trust fund is accounted for under the accrual basis of accounting. Information is provided for the last ten years ended June 30, 2020 for the following five objectives: financial trends; revenue capacity; demographic and economic; and operating.

Financial trends are presented on pages 127 to 131. The schedules contain trend information to aid in understanding how the System's financial performance has changed over time.

Revenue capacity is presented on pages 127, 129, and 130. The schedules contain information regarding the contribution amount and rate history for the last ten years.

Demographic and economic information is presented on pages 132 to 136. These schedules offer demographic and economic indicators to enhance understanding of the environment within which the System's financial activities take place. The schedules show the average monthly benefit payments followed by the System membership.

Operating information is presented on pages 137 and 138. These schedules contain pension plan data to assist in understanding how the information in the financial report relates to the pension plan the System administers. This section includes the schedules of principal participating employers and active members.

Source: Actuarial Valuation reports from June 30, 2011 through 2020.

Note: Actuarial Valuations are prepared subsequent to fiscal year-end and determine rates which pertain to the following fiscal year. For example, the Actuarial Valuation as of June 30, 2020 is used to determine rates for the fiscal year 2021-22.

¹ Effective for the June 30, 2012 Actuarial Valuation, County includes County elected officials (Board of Supervisors, Sheriff, District Attorney and Assessor).

² Effective July 1, 2014, subsequent to the completion of the actuarial valuation for the year ended June 30, 2013, the County and several bargaining groups entered into an agreement for members to pick up an additional portion of the total normal cost in fiscal year 2014-15. The County employer contribution rates shown have not been adjusted to reflect the members agreeing to pick up an additional portion of the normal cost.

³ Miscellaneous Tier 5 and Safety Tier 4 plans were established effective January 1, 2013.

⁴ Miscellaneous Tier 4 and Safety Tier 3 plans were established effective January 1, 2012.

⁵ As of the June 30, 2020 actuarial valuation, there are no Miscellaneous Tier 1 members reported for Special Districts.

REQUIRED COMMUNICATIONS TO THE MEMBERS OF THE AUDIT COMMITTEE AND BOARD OF RETIREMENT IN ACCORDANCE WITH PROFESSIONAL STANDARDS (SAS 114)

To the Audit Committee and Board of Retirement of the
Sacramento County Employees' Retirement System
Sacramento, California

We have audited the financial statements of the Sacramento County Employees' Retirement System (SCERS) as of and for the fiscal year ended June 30, 2020, and have issued our report dated November 23, 2020. Professional standards require that we provide you with information about our responsibilities under auditing standards generally accepted in the United States of America and *Government Auditing Standards*, as well as certain information related to the planned scope and timing of our audit. We have communicated such information in our letter to you dated June 9, 2020. Professional standards also require that we communicate to you the following information related to our audit.

Significant Audit Matters

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by SCERS are described in Note 2, Summary of Significant Accounting Policies, to the financial statements. No new accounting policies were adopted and the application of existing policies was not changed during the fiscal year ended June 30, 2020. We noted no transactions entered into by SCERS during the fiscal year for which there is a lack of authoritative guidance or consensus. All significant transactions have been recognized in the financial statements in the proper period.

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. The most sensitive estimates affecting SCERS' financial statements were:

- Management's estimate of the fair value of investments, which was derived by various methods as detailed in the notes to the financial statements. We evaluated the key factors and assumptions used to develop the estimate of the fair value of investments in determining that it is reasonable in relation to the financial statements taken as a whole.
- The contribution amounts, as detailed in the notes to the financial statements, which are based on the long-term expected rate of return on pension plan investments and actuarial assumptions and methods. We evaluated the key factors and assumptions used to develop the estimates of the contribution amounts in determining that they are reasonable in relation to the financial statements taken as a whole.

TEL 888.565.1040

WWW.BACPAS.COM

Certain financial statement disclosures are particularly sensitive because of their significance to financial statement users. The most sensitive disclosures affecting the financial statements were:

- The disclosures for cash and investments in Notes 2 and 3 to the financial statements, Summary of Significant Accounting Policies and Cash and Investments, respectively, were derived from SCERS' investment policy. Management's estimate of the fair value of investments was derived by various methods as detailed in the notes.
- The disclosures related to the funding policy, net pension liability, and actuarial methods and assumptions in Note 4, Pension Liability and Significant Assumptions, and Note 5, Contributions Required and Contributions Made, were derived from actuarial valuations, which involved estimates of the value of reported amounts and probabilities about the occurrence of future events far into the future.

The financial statement disclosures are neutral, consistent, and clear.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are clearly trivial, and communicate them to the appropriate level of management. The attached schedule summarizes uncorrected misstatements of the financial statements. Management has determined that their effects are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

Disagreements with Management

For purposes of this letter, a disagreement with management is a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated November 23, 2020.

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to SCERS' financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as SCERS' auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition to our retention.

Other Matters

We applied certain limited procedures to the Management's Discussion and Analysis, Schedule of Changes in Net Pension Liability and Related Ratios, Schedule of Employer Contributions, Schedule of Annual Money-Weighted Rate of Return, and Notes to the Required Supplementary Information (RSI), which are RSI that supplement the basic financial statements. Our procedures consisted of inquiries of management regarding the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during the audit of the basic financial statements. We did not audit the RSI and do not express an opinion or provide any assurance on the RSI.

We were engaged to report on the Schedule of Administrative Expenses, Schedule of Investment Fees and Expenses, Schedule of Payments to Consultants, and Statements of Changes in Assets and Liabilities – Agency Fund, which accompany the financial statements but are not RSI. With respect to this other supplemental information, we made certain inquiries of management and evaluated the form, content, and methods of preparing the information to determine that the information complies with accounting principles generally accepted in the United States of America, the method of preparing it has not changed from the prior period, and the information is appropriate and complete in relation to our audit of the financial statements. We compared and reconciled the other supplemental information to the underlying accounting records used to prepare the financial statements or to the financial statements themselves.

We were not engaged to report on the introductory, investment, actuarial, and statistical sections, which accompany the financial statements but are not RSI. Such information has not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide assurance on it.

Restriction on Use

This information is intended solely for the use of the Audit Committee, Board of Retirement, and management of SCERS and is not intended to be, and should not be, used by anyone other than these specified parties.

SCERS
Uncorrected Misstatements
6/30/2020

The uncorrected misstatements are a result of SCERS' cut off procedures for financial reporting and timing of the actuarial valuation for Governmental Accounting Standards Board Statements No. 67. Rollforwards from March 31st balances were utilized as estimates since June 30th statements from investment managers were not available by the cutoff date for financial reporting.

Account	Debit	Credit
Private Equity	\$ 5,661,007	
Net appreciation in fair value of investments		\$ 5,661,007
Private Credit	5,638,313	
Net appreciation in fair value of investments		5,638,313

The result of the above uncorrected misstatements journal entry is as follows, representing a 0.1% increase in the net position of SCERS.

Net Adjustment to investments	\$ 11,299,320	
Net Adjustment to net appreciation in fair value of investments		\$ 11,299,320

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

To the Audit Committee and Board of Retirement of the
Sacramento County Employees' Retirement System
Sacramento, California

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the Sacramento County Employees' Retirement System (SCERS) as of and for the fiscal year ended June 30, 2020, and the related notes to the financial statements, which collectively comprise SCERS' basic financial statements, and have issued our report thereon dated November 23, 2020.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered SCERS' internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of SCERS' internal control. Accordingly, we do not express an opinion on the effectiveness of SCERS' internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of SCERS' financial statements will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether SCERS' financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of SCERS' internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering SCERS' internal control and compliance. Accordingly, this report is not suitable for any other purpose.
