## **SCERS PORTFOLIO RESULTS**

For the reporting quarter ended March 31, 2021, SCERS' Private Equity portfolio registered a spectacular 17.1% return, substantially outperforming its benchmark return of 9.7%. The outstanding performance was driven by SCERS' venture capital investments, with the top 10 funds delivering returns for the quarter from 19.7%-95.5%. SCERS' Private Equity portfolio benefited from the robust demand in the public markets for initial public offerings (IPO), special purpose acquisition corporation (SPAC) vehicles, and corporate mergers, particularly in high growth technology companies, which is leading to robust valuations.

The performance of SCERS' Private Credit portfolio for the quarter ended March 31, 2021 underperformed against benchmark return, 2.0% versus 4.0%, with outperformance among the direct lending strategies but offset by the significant underperformance of the opportunistic credit strategies.

In total, SCERS' Real Assets portfolio underperformed against its benchmark return, 2.6% versus 5.8% for the quarter ended March 31, 2021. However, SCERS' energy strategies received an uplift from the price of oil going from \$51 per barrel to \$69 per barrel, which helped generate 6.8%-24.1% returns among the top 5 performers. Conversely, a number of SCERS' infrastructure strategies underperformed due to the decrease in traffic and use of toll roads, airports, and other transportation assets, as well as volume declines in the midstream energy assets.

For the reporting quarter ended June 30, 2021, SCERS' Absolute Return portfolio outperformed against the HFRI Fund of Funds Composite Index return, 2.9% versus 1.8%, due to the positive performance of the Growth-Oriented portfolio (3.9%), in particular the Equity Long/Short strategy (5.9%) and the Grosvenor Growth Fund-of-Funds strategy (4.1%). SCERS' Diversifying-Oriented Absolute Return portfolio also outperformed against its benchmark return, 2.5% versus 1.8%, benefiting from the Market Neutral strategies (5.2%).
