Agenda Item 11

MEETING DATE: August 16, 2023

SUBJECT: Portfolio Allocation and Rebalancing Report—Second Quarter

2023

Deliberation Receive
SUBMITTED FOR: X Consent and Action and File

RECOMMENDATION

Receive and file the Portfolio Allocation and Rebalancing Report—Second Quarter 2023.

<u>PURPOSE</u>

This item complies with the SCERS Master Investment Policy Statement reporting requirements related to the review of SCERS' current asset allocation as it compares to established targets and ranges, and physical and Overlay Program rebalancing activity that occurred during the quarter.

SUMMARY

SCERS employs an Overlay Program, which is managed by State Street Global Advisors (SSGA), to rebalance the asset allocation to policy targets and also invest available cash, in a manner which replicates SCERS' policy target strategic asset allocation.

Below is a summary of SCERS' asset category and asset class positioning relative to the target allocations as of June 30, 2023 (based on State Street market values, which can differ from those of SCERS' investment consultants). The comparisons to the benchmark allocations below, and throughout the memo, are made in two formats: (1) the difference between the actual and target allocation, and (2) the percentage amount of the actual allocation relative to the target allocation.

		<u>Current</u>	<u>Target</u>		% Relative
Asset Category	Asset Class	<u>Allocation</u>	<u>Allocation</u>	<u>Difference</u>	to Target
GROWTH*		57.3%	58.0%	-0.7%	99%
	Global Equity	39.1%	40.0%	-0.9%	98%
	Private Equity	13.3%	11.0%	2.3%	121%
	Public Credit	1.7%	2.0%	-0.3%	84%
	Private Credit	3.2%	5.0%	-1.8%	64%
	Growth Absolute Return	0.1%	0.0%	0.1%	N/A
DIVERSIFYING*		22.1%	24.0%	-1.9%	92%
	Fixed Income	14.4%	16.0%	-1.6%	90%
	Absolute Return	6.4%	7.0%	-0.6%	92%
	Dedicated Cash	1.3%	1.0%	0.3%	131%
REAL RETURN**		17.9%	18.0%	-0.1%	99%
	Real Estate	8.8%	9.0%	-0.2%	98%
	Real Assets	8.2%	7.0%	1.2%	116%
	Liquid Real Return	1.0%	2.0%	-1.0%	48%
OTHER CASH/OVERLAY		2.5%	0.0%	2.5%	N/A

^{*} Growth and Diversifying allocation weights do not include overlay proxy exposures, which are included in the Overlay allocation

During the second quarter of 2023, the following <u>Overlay Program rebalancing</u> occurred:

- Quarter-end rebalance:
 - Sold \$65 million in Growth proxy
 - Purchased \$67 million in the Diversifying proxy
 - No activity
 - Decreased cash allocation by \$1 million

At quarter-end, SCERS only had \$10 million in the Real Return overlay proxy. Given the limited amount of this proxy available to trade (which is a series of commingled funds; not derivatives like the Growth and Diversifying proxies), at the end of the first quarter, SSGA did not trade the Real Return overlay proxy, and instead offset any under/overweights from the Real Return asset category by allocating with a 60%/40% split between the Growth and Diversifying overlay proxies, as instructed within the investment management agreement with SSGA.

Key current portfolio allocations relative to targets, and physical rebalancing considerations include:

- **Global Equity** has a 39.1% allocation as of June 30, 2023, which is below the 40% target allocation, but within range.
 - Domestic Equity has a 19.8% allocation as of June 30, 2023, up from a 18.6% allocation as of March 31, 2023. The 19.8% allocation is slightly below the 20% target allocation, but within range.
 - No physical rebalancing is recommended at this time
 - o **International Equity** has a 16.8% allocation as of June 30, 2023, up from a 16.5% allocation as of March 31, 2023. The 16.8% allocation is above the 16% target allocation.
 - No physical rebalancing is recommended at this time.

^{**} Real Return allocation includes overlay proxy exposures

- Global/Unconstrained has a 2.4% allocation as of June 30, 2023, down slightly from a 2.5% allocation as of March 31, 2023. The 2.4% allocations is below the 4% target allocation.
 - This is a newer sub-asset class and the remaining allocation will be implemented over time.
 - No physical rebalancing is recommended at this time.
- **Fixed Income** has a 14.4% allocation as of June 30, 2023, down slightly from a 14.7% allocation as of March 31, 2023. The 14.4% allocation is below the 16% target allocation, but within range.
 - No physical rebalancing is recommended at this time.
- **Private Equity** has a 13.3% allocation as of June 30 2023, down slightly from a 13.4% allocation as of March 31, 2023. The 13.3% allocation remains above the target allocation of 11%, but within range.
 - A key driver of the overweight has been the sell-off in the public markets relative to private markets in 2022. Private market valuations are lagged a quarter, and they also typically experience a smoothing effect relative to public markets (they are generally not marketed to market), which has led to inflated private market weightings across most institutional investor portfolios, including Private Equity. The Private Equity overweight has partially subsided as private market valuations have marked negative returns over recent quarters, and public markets have rallied in 2023.
 - Cliffwater and Staff incorporated the overweight into going forward commitment pacing for Private Equity.
- Other Alternative Asset Classes have seen their allocations increase due to the sell-off in public markets. Current weights vs. target include:
 - **Absolute Return** 6.4% vs. 7.0% target
 - o Private Credit 3.2% vs. 5.0% target
 - **Real Assets** 8.2% vs. 7.0% target
 - o Real Estate 8.8% vs. 9.0% target

BACKGROUND

The Overlay Program rebalances the asset allocation to policy targets and minimizes the risk that SCERS falls short of achieving its targeted return due to the asset allocation straying from policy target ranges. The Overlay Program also invests available cash, including: (1) unallocated cash; (2) the cash balances in manager portfolios; and (3) cash held for previously committed to, but un-invested private market investments, in a manner which replicates SCERS' policy target strategic asset allocation. The Overlay Program does not invest the 1% dedicated cash allocation (which was recently increased from 1% to 2%).

While SCERS' Overlay Program reduces the need for physical rebalancing, it does not eliminate it, as there are circumstances whereby physical rebalancing would be a better solution compared to the Overlay Program, including when there is a persistently large difference between physical assets and the target allocation.

While physical rebalancing typically costs more to execute compared to the Overlay Program, it remains important to assess whether SCERS' portfolio is at a point where physical rebalancing warrants greater consideration.

The Overlay Program structure replicates SCERS' asset category targets (Growth; Diversifying; Real Return), with bands around these targets (see below). The rebalancing methodology that SSGA utilizes is quarterly rebalancing with bands, where rebalancing occurs on a quarterly basis (at the end of a quarter), unless the bands are breached on an intra-quarter basis, in which case rebalancing occurs upon the breach of a band.

Asset Category	Minimum Allocation (%)	Target Allocation (%)	Maximum Allocation (%)
Growth	53	58	63
Diversifying	21	24	27
Cash	0	1	2
Real Return	16	18	20

Each asset category has a separate overlay proxy, which contains a mixture of investments that attempt to replicate the objectives and exposures of the asset category and the underlying asset classes within the asset category, in order to minimize tracking error and costs.

The underlying components of each asset category overlay proxy are shown within Appendix B of this report.

Because SCERS' Overlay Program rebalances SCERS' total fund, it is important to note that **Tables 1-15** in Appendix A refer only to physical holdings compared to policy targets, and not the exposures provided through the Overlay Program. The exception is Table 11 (Real Return asset category exposure), which includes the SSGA Real Return Strategy within the Liquid Real Return asset class, which is the Overlay proxy for this asset category, and is implemented through physical exposures (commingled funds).

SCERS' investment staff and general investment consultant, Verus Advisory, monitor the asset allocation on a quarterly basis and update the Board if the asset allocation moves outside of policy ranges and conditions warrant physical rebalancing.

FULL PORTFOLIO REVIEW

GROWTH ASSET CATEGORY:

The Growth asset category is comprised of the Global Equity, Private Equity, Public Credit, and Private Credit segments of the portfolio. The Growth Absolute Return segment was eliminated from the SAA and is close to being wound down. As outlined in **Table 1 of Appendix A**, the Growth asset category currently has an allocation of 57.3%, which is lower than the strategic asset allocation's target of 58%, and the allocation is 99% relative to the target allocation. At a

August 16, 2023 Page 5 of 8 Agenda Item 11

more granular level, the Private Equity exposure is above target while the remaining asset classes are below target.

The Overlay Program rebalances the Growth asset category to the 58% target allocation by purchasing or selling global equity futures to bring the Global Equity asset class to its target allocation, and then adjusts the remainder of the asset category by using a combination of 88% global equity futures and 12% U.S. Treasury futures.

At the end of the quarter, SCERS' overlay manager, SSGA, sold approximately \$65 million of overlay proxy exposure to rebalance the Growth asset category to its target allocation.

Global Equities:

As outlined in **Table 2**, SCERS' Global Equity asset class, which includes the sub-asset classes of Domestic Equity, International Equity, and Global/Unconstrained Equity, has an actual weighting of 39.1%, which is below SCERS' policy target allocation of 40% but within range, and the allocation is 98% relative to the target allocation. No physical rebalancing is recommended at this time.

At the sub-asset class level, Domestic Equity has an actual allocation of 19.8%, which is slightly below its target allocation of 20% (99% relative to the target).

International Equity has an actual allocation of 16.8%, which is higher than the target allocation of 16% (105% relative to the target).

The newly formed Global/Unconstrained segment has a 2.4% allocation, which is below the 4% target allocation (61% relative to target). This is a newer sub-asset class and the remaining allocation will be implemented over time.

SSGA buys and sells a basket of global equity index futures to rebalance the Global Equity asset class toward the policy target allocation.

Private Equity:

As outlined in **Table 3**, SCERS' Private Equity allocation of 13.3% remains above the target allocation of 11%, but within range. The allocation is 121% relative to the target allocation.

SSGA utilizes a basket of 88% global equities and 12% U.S. Treasuries to replicate Private Equity, as part of a broader non-public equity proxy within the Growth asset category.

Public Credit:

As outlined in **Table 4**, SCERS' Public Credit allocation of 1.7% is slightly below the policy target allocation of 2%, and the allocation is 84% relative to the target allocation. SSGA utilizes a basket of 88% global equities and 12% U.S. Treasuries to replicate Public Credit, as part of a broader non-public equity proxy within the Growth asset category.

August 16, 2023 Page 6 of 8 Agenda Item 11

Private Credit:

As outlined in **Table 5**, SCERS' Private Credit allocation of 3.2% is below the revised policy target allocation of 5%, and the allocation is 64% relative to the target allocation. Private credit valuations are lagged a quarter. The commitment schedule and cash flow forecast of Private Credit investments projects SCERS achieving and maintaining the policy target in 2024.

SSGA utilizes a basket of 88% global equities and 12% U.S. Treasuries to replicate Private Credit, as part of a broader non-public equity proxy within the Growth asset category.

Growth Absolute Return:

As outlined in **Table 6**, SCERS' Growth Absolute Return portfolio has a current allocation of 0.1%. The Growth Absolute Return Portfolio was eliminated from the revised SAA, and SCERS has nearly unwound the exposures within this portfolio. The small remaining allocation will be unwound in 2023.

DIVERSIFYING ASSET CATEGORY:

The Diversifying asset category is comprised of the Fixed Income and Absolute Return segments of the portfolio, as well as the dedicated cash allocation. As outlined in **Table 7**, the Diversifying asset category currently has an allocation of 22.1%, which is below the strategic asset allocation's target of 24%, and the allocation is 92% relative to the target allocation.

The Overlay Program rebalances the Diversifying asset category to the target allocation by purchasing or selling U.S. government bond futures.

At the end of the quarter, SCERS' overlay manager, SSGA, purchased approximately \$67 million of overlay proxy exposure to rebalance the Diversifying asset category to its target allocation.

Fixed Income:

As outlined in **Table 8**, SCERS' Fixed Income allocation of 14.4% is below SCERS' policy target allocation of 16%, and the allocation is 90% relative to the target allocation.

The Overlay Program utilizes a combination of U.S. Treasury futures and Mortgage TBAs to rebalance this segment of the portfolio to its policy target allocation, as part of a broader Diversifying asset category proxy. No physical rebalancing is recommended at this time.

Absolute Return:

As outlined in **Table 9**, SCERS' Absolute Return allocation of 6.4% is below the policy target allocation of 7%, and the allocation is 92% relative to the target allocation.

SSGA utilizes a combination of U.S. Treasury futures and Mortgage TBAs to rebalance this segment of the portfolio to its policy target allocation, as part of a broader Diversifying asset category proxy.

REAL RETURN ASSET CATEGORY:

The Real Return asset category is comprised of the Real Estate, Real Assets, and Liquid Real Return segments of the portfolio. As outlined below in **Table 11**, the Real Return asset category currently has an allocation of 17.9%, which is slightly below the strategic asset allocation's target of 18%, and the allocation is 99% relative to the target allocation.

The Overlay Program rebalances the Real Return asset category to the 18% target allocation through the SSGA real return overlay proxy, by purchasing or selling a series of commingled funds across global REITs, global infrastructure stocks, global natural resource stocks, commodities, U.S. TIPS, and floating rate notes.

At quarter-end, SCERS only had \$10 million in the Real Return overlay proxy. Given the limited amount of this proxy available to trade (which is a series of commingled funds; not derivatives like the Growth and Diversifying proxies), at the end of the first quarter, SSGA did not trade the Real Return overlay proxy, and instead offset any under/overweights from the Real Return asset category by allocating with a 60%/40% split between the Growth and Diversifying overlay proxies, as instructed within the investment management agreement with SSGA.

Real Estate:

As outlined in **Table 12**, SCERS' Real Estate allocation of 8.8% is slightly below the policy target allocation of 9%, and the allocation is 98% relative to the target allocation.

SSGA utilizes a series of listed commingled funds described above to replicate Real Estate, as part of the broader Real Return asset category proxy.

Real Assets:

As outlined in **Table 13**, SCERS' Real Assets allocation of 8.2%, is slightly above the policy target allocation of 7%, and the allocation is 116% relative to the target allocation. Private real asset valuations are lagged a quarter.

Real Assets has experienced a meaningful increase in its allocation in 2022, similar to other private market asset classes, which has brought the weighting to and beyond the target allocation rather quickly.

SSGA utilizes a series of listed commingled funds described above to replicate Real Assets, as part of the broader Real Return asset category proxy.

August 16, 2023 Page 8 of 8 Agenda Item 11

Liquid Real Return:

As outlined in **Table 14**, SCERS' Liquid Real Return allocation of 1% is below the policy target allocation of 2%, and the allocation is 48% relative to the target allocation. The Board approved a reduction in the Liquid Real Return allocation from 2% to 1% at the June Board meeting, which will be reflected in future Portfolio Allocation and Rebalancing quarterly reports. The Liquid Real Return allocation is split between a strategic active mandate managed by Brookfield Asset Management and the SSGA Real Return Overlay proxy. The latter is used to adjust broad Real Return asset category exposures during quarterly overlay rebalancing, and accounts for the underweight to the segment.

CASH:

As outlined in **Tables 10 and 15**, SCERS' total cash balance is approximately 3.0% (as of June 30, 2023), which includes a combination of the 1.3% dedicated cash allocation and 1.7% in other cash. The dedicated cash allocation of 1.3% is 131% relative to the 1% target allocation. The Board approved an increase in the dedicated cash allocation from 1% to 2% at the June Board meeting, which will be reflected in future Portfolio Allocation and Rebalancing quarterly reports.

The dedicated cash allocation is intended to close the gap between benefit payments and total contributions in an environment where investment earnings fall short of the targeted assumed rate of return, and also serves as an emergency source of cash during a market dislocation.

Most of the 1.7% other cash allocation incorporates the 2022-23 pre-funded annual employer contribution. The other cash allocation is also used to fund drawdowns within the private markets segments of the portfolio, and other implementation and rebalancing activity. SCERS' Overlay Program rebalances the portfolio by eliminating cash drag by investing the non-dedicated cash allocation (1.7%) into positions that replicate SCERS' target portfolio.
